ASSIGNMENT OF PATENT RIGHTS

Ya-Jane Wang, of Fayetteville, AR, and Sakharam K. Patil of Munster, IN ("Assignors") are owners of U.S. Patent Number: 8,900,650, "Low-Sodium Salt Compositions," issued by the United States Patent and Trademark Office on December 02, 2014 (the "Patent"). Salarius Ltd., a wholly owned subsidiary of Tekcapital plc, Oxford Center for Innovation, New Road, Oxford, OX1 1BY United Kingdom, ("Assignee") desires to acquire all rights in and to the Patent (and any reissues or extensions that may be granted).

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignors assign to Assignee 100% of their right, title, and interest in the invention and Patent (as well as such rights in any divisions, continuations in whole or part or substitute applications) for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part or substitute applications) filed claiming the benefit of the Patent.

The right, title and interest to the Patent is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignors had this assignment not been made.

Assignors further agree to: (a) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (b) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.
