## PATENT ASSIGNMENT

This Patent Assignment (this "Assignment") is entered into as of November 24, 2015, by and between EDGe Surgical, Inc., a Delaware corporation ("Assignee"), and Eidosmed LLC, a Delaware limited liability company ("Assignor").

A. Assignor and Assignee are parties to that certain Asset Purchase Agreement dated as of the date hereof, pursuant to which Assignor has agreed to sell and Assignee has agreed to purchase, among other assets, all of the United States patents and patent applications set forth on the attached Schedule A (the "Patents").

B. Assignor is the sole and exclusive owner of the right, title and interest in, to and under the Patents, and Assignee wishes to acquire and Assignor wishes to transfer to Assignee all right, title and interest in, to and under the Patents.

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, convey, transfer, assign and deliver to Assignee, the entire right, title and interest in and to the Patents, for the United States and for all foreign countries, and the inventions they claim (including subject matter capable of being reduced to a patent claim in a reissue or reexamination proceeding relating to any of the Patents and subject matter that could have been included as a claim in any of the Patents), and any and all continuations, divisionals, continuations-in-part, reissues, reexaminations, extensions, international applications or foreign equivalents thereof, which may be obtained therefrom for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made; together with all income, royalties, damages or payments due or payable as of the date hereof or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives.

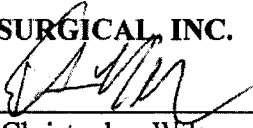

Assignor authorizes and requests the appropriate governmental authority to record Assignee as owner of the Patents, including any continuations, divisions, continuations-in-part, reissues, reexaminations, international applications or extensions thereof, and to issue any and all letters patent thereon to Assignee, as assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assigns or other legal representatives.
