## PATENT ASSIGNMENT

WHEREAS, I, **Albert Rodewald**, an individual residing in Franklin, Tennessee, have invented certain designs related to a Wound Drain Dome (hereinafter "the Design") as described in U.S. Design Patent Application Serial No. 29/494,485 filed on June 20, 2014 (hereinafter "the Patent Application"); and

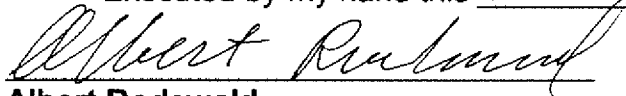

WHEREAS, **Integrated Healing Technologies, LLC. ("IHT")**, a limited liability company organized under the laws of the State of Delaware, desires to acquire certain rights, title and interest in and to the Design, the Patent Application, and any U.S. or foreign patents that may be issued therefrom;

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, I, **Albert Rodewald**, do hereby assign and transfer unto **IHT** the full and exclusive right to the Design and the entire rights, title and interest in and to the Patent Application and any and all patents which may be granted therefore.

I, hereby authorize and request the Commissioner for Patents to issue said patents to **IHT**, of the entire right, title, and interest in and to the same, for his sole use and behoof; and for the use and behoof of his legal representatives, to the full end of the term for which said patents may be granted, as fully and entirely as the same would have been held by me had this assignment and sale not been made.

Further, I promise and agree to perform, upon request, such other acts as **IHT** may require to enable it or them to procure said patents on the Design or any reissues or extensions thereon in the United States and/or in any foreign country, and/or to hold, enforce or convey said patents, reissues or extensions.
