## PATENT ASSIGNMENT

**WHEREAS, SIGNATURE HARDWARE, LLC**, a Missouri limited liability company (“Assignor”) is the owner of at least one-half of the entire right, title, and interest in the U.S. Patent No. 7,698,796 (“Patent”), and

**WHEREAS, DESIGN HARDWARE, LLC**, a Delaware limited liability company (hereinafter referred to as Assignee), is desirous of acquiring the entirety of Assignor’s interest in the domestic and foreign right, title, and interest in and under the invention described in the Patent.

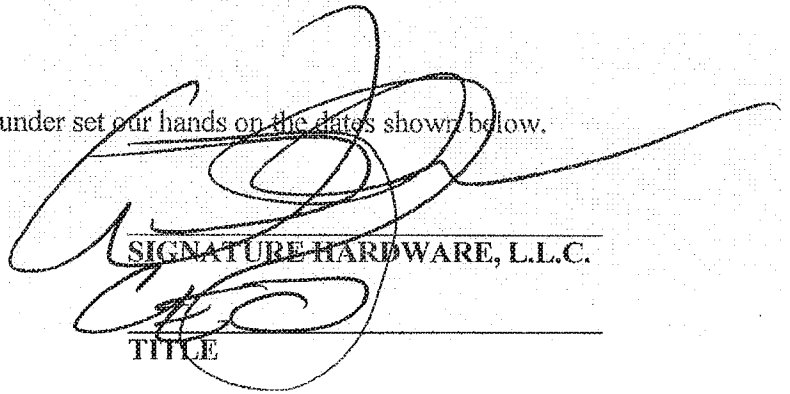

**NOW, THEREFORE**, for good and valuable considerations, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby assigns and transfer to the Assignee and the Assignee's legal representatives, successors and assigns the one hundred percent (100%) of Assignor’s rights in and to the inventions described in the Patent in the U.S. and every foreign country and the entire right, title, and interest in and to the Patent and other such applications (e.g., provisional applications, non-provisional applications, continuations, continuations-in-part, divisionals, reissues, reexaminations, National phase applications, including petty patent applications, and utility model applications) that may be filed in the United States and every foreign country on the invention, and the patents, extensions, or derivations thereof, both foreign and domestic, that may issue thereon, and we do hereby authorize and request the Commissioner of Patents to issue U.S. patents to the above-mentioned Assignee agreeably with the terms of this assignment document.

**UPON SAID CONSIDERATION**, Assignor conveys to the Assignee all of its rights in the Patent, any pending related applications, and right to make application in its own behalf for protection of the invention in countries foreign to the U.S. and to claim under the Patent Cooperation Treaty, the International Convention and/or other international arrangement for any such application the date of the U.S. application (or any other application on the invention) to gain priority with respect to other applications.

**ASSIGNOR DOES HEREBY COVENANT** and agree with the Assignee that Assignor will not execute any writing or do any act whatsoever conflicting with the terms of this assignment document set forth herein, and that Assignor will at any time upon request, without further or additional consideration, but at the expense of the Assignee, execute such additional assignments and other writings and do such additional acts as the Assignee may deem necessary or desirable to perfect the Assignee's enjoyment of this assignment, and render all necessary assistance in making application for and obtaining original, continuation, continuation-in-part, divisional, reissued, reexamined, and National phase patents of the U.S. or of any and all foreign countries on the invention, and in enforcing any rights or choses in action accruing as a result of such applications or patents, and by executing statements and other affidavits, it being understood that the foregoing covenant and agreement shall bind, and inure to the benefit of, the assigns and legal representatives of all parties hereto.
