for which I have made an application for letters patent of the United States.

AND WHEREAS, **SPORT MASKA INC.**, 3400, Raymond-Lasnier St, Montreal, Quebec, H4R 3L3, Canada, hereafter "the Assignees", are desirous of acquiring the entire right, title and interest to and under said invention and any United States letters patent that may be granted for such application.

NOW, for good and valuable consideration, the receipt of which is hereby acknowledged, I do hereby assign, sell and transfer to the Assignees the entire right, title and interest in and to said invention and said application for letters patent of the United States, and in and to all divisions and continuations of said application, and in and to any letters patent of the United States and all reissues and extensions thereof that may be granted, together with all rights of priority granted by local laws and treaties including any international convention for the protection of industrial property, together with the right to extend the protection for said letters patent of the United States to the various territorial possessions now owned or which may be hereafter acquired by the United States of America, and all applications for letters patent and/or design protection which may hereafter be filed for said invention in any country or countries foreign to the United States, and all extensions, renewals and reissues thereof, all said rights to be held and enjoyed by the Assignees, its successors, legal representatives and assigns, to the full end of the term for which said letters patent for all such countries may be granted, as fully and entirely as the same would have been held and enjoyed by us if this assignment had not been made. I do hereby request and authorize that any and all letters patent, when granted, be issued in accordance with this assignment to the Assignees.

In further consideration of said good and valuable consideration, I covenant and agree with the Assignees that they have a full and unencumbered title to the invention hereby assigned, which title I warrant unto the Assignees, and I further agree that I will, without demanding any further consideration therefor, at the request but at the expense of the Assignees, do all lawful and just acts, including the execution and acknowledgment of instruments, furnishing of information and giving of testimony, that may be or become necessary for obtaining, sustaining, or reissuing United States and foreign letters patents for said invention, and for maintaining and perfecting the Assignees' right to said invention and letters patent, particularly in cases of interference and litigation.
