# INVENTION, PATENT AND INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Invention, Patent and Intellectual Property Assignment Agreement is made this 11 day of October, 2016 by and between AmTote International, Inc. ("Assignor"), a Delaware corporation with a principal office at 11200 Pepper Road, Hunt Valley, MD 21031, and PariMax Holdings, LLC, a Delaware limited liability company, having a principal place of business at: 11200 Pepper Road, Hunt Valley, MD 21031 ("Assignee"):

WHEREAS, Assignor is the owner of the following issued U.S. patents and Patent Cooperation Treaty (PCT) patent application:

- US Patent Application No. 14/685,171, entitled "Method for Pari-Mutuel Wagering," filed on April 13, 2013, which issued on September 13, 2016 as Patent No. 9,443,392;
- US Patent Application No. 14/829,291, entitled "Method for Pari-Mutuel Wagering," which was filed as a Continuation-in-Part of US Patent Application No. 14/685,171 on August 18, 2015, and which issued on September 6, 2016 as US Patent No. 9,437,078; and
- PCT Application No. PCT/US2016/26184, entitled "An Improved Method for Pari-Mutuel Wagering," which was filed on April 6, 2016, and which claims the benefit of US Patent Application Nos. 14/685,171 and 14/829,291.

The above set forth patents and applications (collectively the "Patents and Applications") disclose inventions in the field of pari-mutuel wagers on previously-run, order-of-finish contests (collectively, the inventions disclosed in such Patents and Applications hereafter the "Inventions").

WHEREAS, Assignor and Assignee hereby make and confirm the assignment to Assignee of all present and future rights, title, and interest to the Inventions and Patents and Applications, including but not limited to all rights, title, and interest in all patent, copyright, trade secret, trademark and other proprietary rights embodied in, evidenced by or otherwise described in the Inventions and Patents and Applications (collectively the "IP Rights");

NOW, THEREFORE, for good and valuable consideration of the mutual promises herein and one dollar in hand paid, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignor does hereby assign, transfer and convey unto Assignee, its successors and assigns, and automatically assigns, transfers and conveys in the future, the entire right, title and interest in and to all Patents and Applications, Inventions and IP Rights, including but not limited to all derived patents (and rights to make derived patents) as that term is understood within the meaning of 35 USC § 291(a), patent divisions, re-issues, revivals, continuations or continuations-in-part, substitute patent applications, and extensions thereof, in the United States and anywhere in the world, (including but not limited to the right to apply for letters patent in foreign countries in the Assignee's own name and to claim any priority rights for such foreign applications to which such applications are entitled under international conventions, treaties, or otherwise).
2. Assignor does further agree to execute and deliver without further consideration all further applications, assignments and documents, and to perform such other acts as Assignee may reasonably request or that are deemed necessary by Assignee, its successors, assigns and nominees, to fully secure Assignee's ownership interest in the Patents and Applications, Inventions and IP Rights as aforesaid and to obtain or maintain letters patent in any and all countries. If Assignor fails, refuses or is otherwise unable to execute such documents, the Assignor hereby appoints the then president of the Assignee as its due and lawful attorney-in-fact with the power of attorney to execute such documents and take such acts under this paragraph as Assignor was required to execute or take, such power being coupled with an interest herein and irrevocable.
3. Assignor does hereby authorize and request the Commissioner of Patents and, in the event foreign patent applications are filed, the heads of the foreign patent granting entities where foreign patent applications are filed, to reflect on the public record ownership in the Assignee of the entire right, title and interest in and to the Patents and Applications, Inventions and IP Rights.

Once this Assignment is signed and delivered, any reproduction of this Assignment made by reliable means (for example, .pdf or TIFF format) will be considered an original.
