For valuable consideration, the receipt and sufficiency of which he/she acknowledges, Assignor hereby sell, assign, and transfer to Assignee, its successors, legal representatives and assigns, the entire worldwide right, title and interest in and to: the Invention(s), the Application, and any Patents that may be granted for the Inventions in the United States or in any foreign countries; any divisions, continuations, and continuations-in-part of the Application and any other application claiming priority rights from the Application; any prior Invention(s), or Patents from which the Application claims priority rights, at least to the extent such priority rights are claimed in the Application; any reissues, reexaminations, or extensions of any and all Patents; the right to file foreign applications directly in the name of Assignee; and the right to claim priority rights deriving from the Application (collectively, the "Rights"). Assignor warrant that they are the owners of the Rights, and that the Rights are unencumbered.
