ASSIGNMENT

Whereas, We, below named and undersigned inventors, have made certain inventions, improvements, and discoveries (herein referred to as the "Invention") in:

Title of the Invention: **Hopper Transportable In Parts And Assembly Method**

and further identified by the Docket Number provided above in the header of this Assignment, for which an application for a United States Patent was executed concurrently herewith or was filed having:

Application No.: 15/262,252 Filed September 12, 2016

Whereas, Minetec S.A., a corporation of Chile having a place of business at Avenida Américo Vespucio N° 2101, Renca, Santiago, Región Metropolitana, Chile (herein referred to as Minetec S.A.) desires to acquire, and we desire to grant to Minetec S.A. our entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications and patents directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, We ("ASSIGNOR") hereby sell or have sold, assign or have assigned, and otherwise transfer or have transferred to Minetec S.A. (the "ASSIGNEE"), its successors, legal representatives, and assigns, our entire worldwide right, title, and interest in and to the Invention, the above-identified United States patent application, and any and all other patent applications and patents for the Invention which may be applied for or granted therefor in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and extensions thereof, and all rights of priority resulting from the filing of such applications and granting of such patents. In addition, We hereby authorize and request the Director of the United States Patent and Trademark Office to issue any United States Patent, and foreign patent authorities to issue any foreign patent, granted for the Invention, to Minetec S.A. its successors, legal representatives, and assign, our entire worldwide right, title, and interest in and to the same to be held and enjoyed by Minetec S.A. its successors, legal representatives, and assigns to the full end of the terms for which any and all such patents may be granted, as fully and entirely as would have been held and enjoyed by us had this Assignment not been made; and We agree to execute any and all documents and instruments and perform all lawful acts reasonably related to recording this Assignment or perfecting title to the Invention and all related patents and applications, in Minetec S.A. its successors, legal representatives, and assigns, whenever requested by Minetec S.A. its successors, legal representatives, or assigns.

We acknowledge our prior and ongoing obligations to sell, assign, and transfer our rights under this Assignment to Minetec S.A. and are unaware of any reason why we may not have the full and unencumbered right to sell, assign, and transfer our rights hereby sold, assigned, and transferred, and have not executed, and will not execute, any document or instrument in conflict herewith. We also hereby grant Minetec S.A., its successors, legal representatives, and assigns, the right to insert in this Assignment any further identification (including, but not limited to, patent Application Number) which may be necessary or desirable for recordation of this Assignment. This Assignment is governed by the substantive laws of the State of New York, and any disputes will be resolved in a New York state court or federal court sited in New York.
