Exhibit 2.5

ASSIGNMENT AGREEMENT

This Assignment Agreement (the "Agreement") is made and entered into this <sup>28</sup>~~23rd~~ day of June 2016 (the "Effective Date"), Siemens Aktiengesellschaft of Wittelsbacherplatz 2, Munich, Germany (the "Assignor") and Munitech IP S.à.r.l., a private limited liability company (société à responsabilité limitée) incorporated and existing under the laws of the Grand Duchy of Luxembourg, having its registered office at 15, rue Edward Steichen, L-2540 Luxembourg, Grand Duchy of Luxembourg and registered with the Luxembourg Trade and Companies' Register (Registre de Commerce et des Sociétés) under number B 199.688 ("Assignee").

RECITALS

A. Assignor is the owner of the United States and non-United States patents, patent applications and provisional patent applications set forth on Appendix A hereto, which collectively shall be referred to herein as the "Patents".

B. Assignor and Assignee have agreed by way of a purchase agreement (the "Purchase Agreement") dated June 28, 2016, 2016, by and between Assignor and Assignee, the terms of which are incorporated herein by reference, that Assignor shall sell, transfer, and assign and set over unto Assignee and Assignee shall accept, all rights, title and interest in and to the Patents as specified in this Agreement. In the event of any conflict between the terms of this Patent Assignment Agreement and the referenced Purchase Agreement, the terms of the Purchase Agreement shall prevail.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises, and the covenants and agreements in this Assignment, Assignor and Assignee agree as follows:

1. Assignor does hereby, transfer, convey, assign and deliver to Assignee all of Assignor's right, privilege, title and interest in, to and under the Patents and in the case of patent applications in and to any patents that may issue therefrom, including, in all instances, any counterparts of any of the foregoing in any jurisdiction throughout the world, and any and all divisions, continuations, reissues or reexaminations of any of the foregoing, including all damage claims for past infringement, all related claims for information, including on the sources and distribution channels of infringing products, claims for rendering of accounts, and claims for destruction of infringing goods and reasonable compensation (hereinafter "Damages") now or hereafter due or payable with respect thereto, and all causes of action (whether in law or equity) by reason of past, present and future infringements of the Patents, along with the right to sue for, counterclaim, recover and collect such Damages for the use and benefit of Assignee and its successors, assigns and other legal representatives. Assignee hereby accepts this assignment.
2. Insofar as this assignment concerns European patents and patent applications, Assignor hereby agrees that the Assignee shall record in the register with the European Patent Office and/or national patent offices; and Assignee hereby declares that Assignee has agreed to the assignment of the aforementioned Patents to it.
3. Assignor hereby authorizes and requests the Commissioner for Patents of the United States, and any officer of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of intellectual property protection or applications as aforesaid, to issue the same to

Assignee and its successors, assigns and other legal representatives in accordance with the terms of this instrument.

4. Assignor agrees that, whenever reasonably requested by Assignee, Assignor will execute all papers, take all rightful oaths, and do all acts which may be reasonably necessary for securing and maintaining the Patents in any country and for vesting title thereto in Assignee, its successors, assigns and legal representatives or nominees.

5. Assignor authorizes and empowers Assignee, its successors, assigns and legal representatives or nominees, to invoke and claim for any application for patent or other form of protection for the inventions underlying the Patents, the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, or any other international agreement or the domestic laws of the country in which any such application is filed, as may be applicable, and to invoke and claim such right of priority without further written or oral authorization from Assignor.

6. In accordance with the Purchase Agreement, Assignor subrogates the Assignee, as of the signature of this agreement, in all its rights and actions pertaining to the Patents. Assignee shall be entitled, consequently: (i) to use and dispose of the Patents as its own property; and (ii) to take and continue any legal action pertaining to the assigned Patents, notably for infringement, and to be awarded damages including for facts that occurred prior to this assignment.

7. Assignor hereby consents that a copy of this Agreement shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document that may be required in any country for any purpose and more particularly in proof of the right of Assignee or nominee to claim the aforesaid benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it.

IN WITNESS WHEREOF, the Parties have executed this Assignment on the Effective Date.

Assignor: Siemens Aktiengesellschaft  
(First Representative Signature)

By: ppc Main
