<i>Phillip Ruehl, the inventor of the frame rail technology that is the subject of AM General's U.S. Patent Application No. 11/670217 and related foreign applications, filed a declaratory judgment action in Wisconsin state court on February 10, 2010 claiming ownership of the patent rights. AM General filed a motion to dismiss on the grounds that Mr. Ruehl was required to file suit in the Northern District of Indiana pursuant to the terms of an agreement relating to development of the technology. The court granted AM General's motion and Mr. Ruehl did not re-file the action. However, Mr. Ruehl also filed a patent application in the United States for the frame rail technology. The Patent Trial and Appeal Board recently reversed the patent examiner's claim rejections in this application. The application remains pending.</i>
