PATENT ASSIGNMENT

This PATENT ASSIGNMENT (“*Assignment*”) is entered into as of December 2, 2016, by and between **Remington Arms Company, LLC**, a Delaware limited liability company (“*Assignor*”), and **The Kyjen Company, LLC**, a Colorado limited liability company (“*Assignee*”).

WHEREAS, Assignor is the owner of the patents, patent applications and invention disclosures identified in Attachment 1 attached hereto (collectively, the “*Patents*”) and Assignee is desirous of acquiring Assignor’s entire right, title and interest in the Patents.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, assign, transfer and convey unto Assignee, its successors and assigns, Assignor’s entire right, title and interest in and to the Patents and in all divisions, continuations, continuations-in-part, reissues, reexaminations and extensions relating thereto, and in all foreign counterparts thereto (collectively, the “*Assigned Patents*”), as well as Assignor’s right to recover damages and/or profits that have arisen or may arise from any infringement of the same; the rights to such Assigned Patents to be held and enjoyed by Assignee for its own use, and to inure to the benefit of its successors and assigns for the full extent of the terms thereof, as fully and entirely as the same would have been held and enjoyed by Assignor had this Assignment not been made.

Assignor agrees to take such further acts and execute such further documentation as reasonably deemed necessary by Assignee to compete the transfer of the Assigned Patents.

Assignor hereby requests the United States Patent and Trademark Office, and the corresponding entities or agencies in any applicable foreign countries or multinational authorities, to record Assignee as the assignee and owner of the Assigned Patents and to deliver to Assignee, and to Assignee’s attorneys, agents, successors or assigns, all official documents and communications as may be warranted by this Assignment.

The undersigned hereby grants an authorized representative of Assignee the power to insert in this Assignment any further identification that may be necessary or desirable to comply with the rules of the United States Patent and Trademark Office for recordation of this Assignment.

This Assignment and any claim, controversy, dispute, or cause of action (whether in contract, tort, or otherwise) based upon, arising out of, or relating to this Assignment and the transactions contemplated hereby shall be governed by, and construed in accordance with, the laws of the United States and the State of Delaware, without giving effect to any choice or conflict of law provision or rule (whether of the State of Delaware or any other jurisdiction). This Assignment shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and assigns.

This Assignment may be signed in separate counterparts (including by facsimile or portable document format (.pdf)), each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.
