PATENT ASSIGNMENT AGREEMENT

This Patent Assignment Agreement (this "Assignment") is dated as of November 21<sup>st</sup>, 2014 (the "Effective Date"), and is entered into between Les Laboratoires Servier, having its place of business at 50 Rue Carnot, 92150 Suresnes, France ("Servier") and Pharmacyclics, Inc., a Delaware corporation, having its place of business at 995 East Arques Avenue, Sunnyvale, California 94085, USA ("Pharmacyclics").

WHEREAS, Servier and Pharmacyclics entered into a Collaboration Agreement dated April 9, 2009 (the "Collaboration Agreement"), whereby Servier and Pharmacyclics agreed to collaborate on the development of pan-HDAC inhibitors;

WHEREAS, the Collaboration Agreement is terminated as of November 23, 2014; and

WHEREAS, Servier has agreed to assign all of its right, title and interest in and to any patents and patent applications developed pursuant to the Collaboration Agreement;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

Servier hereby sells, assigns, transfers and sets over to Pharmacyclics and its successors, assigns and other legal representatives all of Servier's right, title and interest in and to the patents and patent applications disclosed in Schedule A attached hereto ("the "Schedule A Patent Rights") and Schedule B attached hereto ("the "Schedule B Patent Rights"), including for clarity, (a) in and to all embodiments of any inventions in the Schedule A Patent Rights and the Schedule B Patent Rights, (b) the right to claim priority to and from the Schedule A Patent Rights and the Schedule B Patent Rights, (c) in and to each and every application that is a divisional, substitution, continuation, continuation-in-part or national stage filing of any of the Schedule A Patent Rights or the Schedule B Patent Rights, (d) in and to each and every patent issuing or reissuing from any of the foregoing, (e) in and to each and every reissue, reexamination, renewal or extension of any kind of any of the foregoing, (f) in and to each and every patent and application filed outside the United States and corresponding to any of the foregoing now or hereafter in effect, and (g) in and to all claims for past, present and future infringement of the Patent(s), including all rights to sue for and to receive and recover for Pharmacyclics' own use all past, present, and future lost profits, royalties, and damages of whatever nature recoverable from an infringement of the Schedule A Patent Rights and/or the Schedule B Patent Rights (altogether referred to as the "Patent Rights"), for Pharmacyclics' own use and enjoyment, and for the use and enjoyment of Pharmacyclics' successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Servier if this assignment and sale had not been made.

Servier authorizes and requests the United States Commissioner of Patents and Trademarks and any other applicable non-United States government authorities record Pharmacyclics as the sole assignee and owner of the Schedule A Patent Rights and the Schedule B Patent Rights, and issue any and all registrations thereon solely to Pharmacyclics, as sole assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Pharmacyclics and its successors, assigns or other legal representatives.

Servier shall provide, or cause its current or former employees or consultants to provide, to Pharmacyclics, its successors, assigns or other legal representatives, cooperation and assistance at Pharmacyclics' request and expense but without additional compensation, (including, without limitation, the execution and delivery of any and all affidavits, declarations, oaths, samples, exhibits, and other

documentation as may be reasonably required) in connection with (1) preparation, prosecution, reexamination, or reissue of any patent or application within the Schedule A Patent Rights and the Schedule B Patent Rights that Pharmacyclics may reasonably deem appropriate that may be secured under the laws now or hereafter in effect in the United States or any foreign countries; (2) prosecution or defense of any cancellation, opposition, *inter partes* review, post grant review, infringement or other proceedings that may arise in connection with any of the Schedule A Patent Rights or the Schedule B Patent Rights, including, without limitation, testifying as to any facts relating to the Schedule A Patent Rights, the Schedule B Patent Rights and this Assignment; (3) enforcement of Pharmacyclics' rights in any Schedule A Patent Rights or the Schedule B Patent Rights; and (4) implementation, perfection and/or recording of this Assignment.

This Assignment will inure to the benefit of Pharmacyclics, its successors and assigns, and will bind Servier and its successors and permitted assigns, except that Servier may not assign this Assignment without the consent of Pharmacyclics. This Assignment will be governed in all respects, whether as to validity, construction, capacity, performance or otherwise, by the laws of France without reference to its conflicts of law provisions. If any term or provision of this Assignment will, to any extent or for any reason, be held to be invalid or unenforceable, the remainder of this Assignment will not be affected thereby and will be construed as if such invalid or unenforceable provision had never been contained herein or been applicable in such circumstances. This Assignment may not be amended unless mutually agreed upon in writing by both Pharmacyclics and Servier, and no waiver will be effective unless signed by Pharmacyclics.

The Patent Rights are assigned by Servier to Pharmacyclics on an "as is" basis, without any representations or warranties, express or implied, of any kind, and Servier expressly disclaims all such representations and warranties to the maximum extent permitted under applicable law. Pharmacyclics, on behalf of itself and its affiliates, sublicensees, successors, assigns and other legal representatives, accepts all risk and liability in relation to the use of the Patent Rights received from Servier under this Agreement
