WHEREAS, we, **Dayne Wilcox** of Menlo Park, California, **Lea Kobeli** of San Francisco, California, **Marie Noury** of Croix, France, and **Marcelle Van Beusekom** of San Francisco, California, hereinafter called the *ASSIGNOR(s)* invented certain new, original, and ornamental designs for which the *ASSIGNORS* executed applications for United States Design Patents applications set forth on the attached Schedule.

WHEREAS, the *ASSIGNORS* hereby does authorize and request the attorney(s) and/or agent(s) recording the present assignment, to insert the filing dates and application numbers of said applications, when known;

WHEREAS, **Corning Optical Communications LLC**, a Corporation of the State of North Carolina, with a place of business at 800 17<sup>th</sup> Street NW, Hickory, North Carolina 28601-3336, hereinafter called the *ASSIGNEE*, desires to acquire the entire right, title, and interest in and to said design applications, all inventions disclosed therein, and any patents that may issue thereon;

AND, WHEREAS, it is the intent of the *ASSIGNORS* to assign to the *ASSIGNEE* all rights to the referenced applications, including but not limited to all substantive rights, the (future) right to claim priority, the right to be granted a patent in the United States from the referenced design applications, and the right to be granted additional patents or registrations anywhere in the world from applications claiming priority to the referenced design applications;

NOW, THEREFORE, in consideration of One Dollar (\$1.00), the receipt of which is hereby acknowledged, and for other good and valuable consideration, *ASSIGNORS* hereby sell, assign, and transfer to said *ASSIGNEE*, its successors, and its assigns, the entire right, title, and interest—including the right to sue for past infringement, if any, and the (future) right to claim priority—in and to said design applications, any and all inventions disclosed in said design applications, any and all improvements made to said inventions, any and all applications (including divisions and continuations) anywhere in the world claiming priority to said design applications, and any and all patents or registrations that may be granted anywhere in the world on said design applications or on any application (including divisions and continuations) claiming priority to said design applications, including any and all substitutions, renewals, re-examinations, extensions, and reissues of such patents.
