ASSIGNMENT

WHEREAS, we, Jon Donner of Barcelona, Spain; Renaud Marty of Barcelona, Spain; and Romain Quidant of Barcelona, Spain (hereinafter "Assignors"), have invented certain new and useful improvements in ADAPTIVE PHOTOTHERMAL LENS (hereinafter "Invention") for which application for a U.S. Patent was made on March 17, 2017 as Application Serial No. 15/462,051 (hereinafter "Application"), and claims priority to U.S. Patent Application No. 14/222,349 filed March 21, 2014 (hereinafter "Applications"). Assignors hereby authorize Jenkins, Wilson, Taylor & Hunt, P.A. to insert the filing date and Serial No. above.

AND, WHEREAS, Fundació Institut de Ciències Fotòniques, a corporation duly organized and existing under the laws of Spain, having its principal office and place of business at Parc Mediterrani de la Tecnologia, Av., Carl Friedrich Gauss, núm. 3, 08860 Castelldefels, Spain; and Institució Catalana de Recerca i Estudis Avançats, a corporation duly organized and existing under the laws of Spain, having its principal office and place of business at Passeig Lluís Companys, 23, E-08010 Barcelona, Spain (hereinafter "Assignees"), are desirous of acquiring an interest therein.

NOW, THEREFORE, To Whom It May Concern, be it known that for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignors have sold and by these presents do hereby sell, assign, transfer, and convey unto the Assignees, their successors, and assigns, their entire right, title, and interest in and to the Invention and Applications, and in and to any and all U.S. and foreign patent applications filed on the Invention, and in and to any and all continuations, continuations-in-part, or divisions thereof, and in and to any and all Patents of the United States of America and all foreign countries or reissues thereof which may be granted therefor or thereon (hereinafter, "Patents"), for the full end of the term for which said Patents may be granted, together with their right to claim the priority of the Applications in all countries in accordance with the Paris Convention, the Patent Cooperation Treaty, or other agreement or national law under which priority can be claimed, the same to be held and enjoyed by said Assignees, their successors, and

assigns, as fully and entirely as the same would have been held and enjoyed by Assignors if this Assignment and sale had not been made. It is expressly agreed by Assignors and Assignees that this Assignment fully conveys and transfers from Assignors to Assignees the right to sue for any and all patent infringement occurring prior to the date of this Assignment.

Assignors hereby request that said Patents be issued in accordance with this Assignment.

Assignors further covenant and agree that, at the time of the execution and delivery of these presents, Assignors possess the unencumbered right and authority to make this Assignment.

Assignors further covenant and agree, and likewise bind their heirs, legal representatives, and assigns, to promptly communicate to said Assignees or their representatives any facts known to them relating to the Invention, to testify and/or assist as requested by the Assignees in any interference or legal proceedings involving the Applications, Patents, or Invention, including cooperating in any enforcement proceedings involving the Applications, Patents, or Invention, to execute any additional papers which may be requested to confirm the right of the Assignees, their representatives, successors, and assigns to secure patent or similar protection for the Invention in all countries and to vest in the Assignees complete title to the Invention and Patents, without further compensation, but at the expense of said Assignees, their successors, assigns, and other legal representatives.
