## ASSIGNMENT

WHEREAS, **Yasushi Shigeta** (the "Inventor") has invented certain new and useful inventions and improvements disclosed in an application for patent entitled:

### CARD SHOOTER DEVICE AND CARD STORAGE METHOD

("the Inventions"), for which a U.S. national-stage application of International Application No. PCT/JP2015/002459 was filed in the United States Patent and Trademark Office on November 14, 2016 and accorded U.S. Patent Application No. 15/311,186 (the "Application");

AND, WHEREAS, **Angel Playing Cards Co., Ltd.**, with an address at 4600, Aono-cho, Higashiomi-shi, Shiga 527-0232, Japan, is desirous of acquiring the entire right, title, and interest in and to the Inventions and the Application in the United States and throughout the world;

NOW, THEREFORE, for and in consideration of good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Inventor does hereby sell, assign, transfer and convey to the Assignee the entire right, title, and interest in and to: (a) the Inventions in the United States and throughout the world, and (b) any Letters Patent or similar legal rights, including extensions of such rights, in the United States and its territorial possessions and in all foreign countries to be obtained for the Inventions by the Application or any provisional, non-provisional, continuation, division, substitute, renewal, reissue, reexamination, review, or other application for patent related to the Inventions, or by any equivalents thereof in all foreign countries.

ALSO, the Inventor further assigns to the Assignee, its successors, assigns and legal representatives all rights to make application for patent or other forms of protection for the Inventions in the United States and its territorial possessions and in any foreign countries and to prosecute such applications, together with the right to claim and receive the benefit of any priority rights provided under any applicable laws, conventions, treaties, statutes or regulations and the right to claim such priority rights without further written or oral authorization.

ALSO, the Inventor hereby authorizes and requests the Commissioner for Patents of the United States and any official of any country or countries foreign to the United States whose duty it is to issue Letters Patent or similar legal rights, to

issue all such Letters Patent or similar rights for the Inventions to the Assignee, as assignee of the entire right, title, and interest in and to the Inventions, for the Assignee's own use and benefit, and for the use and benefit of the Assignee's successors, assigns and legal representatives, to the full end of the term for which such Letters Patent or similar rights may be granted, as fully and entirely as the same would have been held and enjoyed by the Inventor had this assignment not been made.

ALSO, the Inventor hereby covenants and agrees to execute and deliver to Assignee, its successors, assigns or legal representatives any documents that legally may be necessary or desirable in connection with the filing, prosecution and maintenance of the Application or any other application for patent which has been or shall be filed in the United States and its territorial possessions or in any foreign countries for the Inventions, including any additional documents or instruments of transfer to affirm the rights of Assignee, its successors, assigns or legal representatives in and to the Inventions, all without further consideration. The inventor also agrees, without requesting or receiving additional consideration from Assignee, but at Assignee's expense, to identify and communicate to Assignee, its successors, assigns or legal representatives all facts known to the Inventor relating to the Inventions and the history of the Inventions, and to provide further assurances and testimony on behalf of Assignee, its successors, assigns or legal representatives that lawfully may be necessary or desirable with respect to the prosecution, maintenance, enforcement, or defense of any patent application or Letters Patent encompassed within the terms of this assignment. The Inventor's obligations under this assignment shall extend to the Inventor's heirs, executors, administrators, and legal representatives.

ALSO, the Inventor covenants and agrees that no assignment, grant, mortgage, license or other agreement encumbering the rights and property herein conveyed has been made to others by the Inventor, and that the full right to convey the same as expressed herein is possessed by the Inventor.
