ASSIGNMENT AGREEMENT

THIS AGREEMENT is made by and between **Andrew Emmett Seligman** (“Assignor”) and **YouSpace, Inc.**, a company having its principal place of business at **2177 Leghorn Street, Mountain View, California 94043** (“Assignee”) (collectively, the “Parties”).

WHEREAS, Assignor has invented one or more inventions (“**Invention(s)**”) described in United States Application No. 15/478201, filed on 03-APR-2017 and titled **SYSTEMS AND METHODS FOR GESTURE-BASED INTERACTION** (“**Application**”). Assignor hereby authorizes and requests that Assignee cause the filing date and application number of the Application be inserted into the spaces provided above when known, if not already known.

WHEREAS, Assignor wishes to give, and Assignee desires to acquire, the entire right, title and interest in and to the Invention(s) and the Application, and in and to any patents (collectively, “**Patents**”) that may be granted for the Invention(s) in the United States or in any foreign countries.

NOW THEREFORE, for valuable consideration, the receipt and sufficiency of which Assignor hereby acknowledges, the Parties agree as follows:

1. *Assignment.* Assignor hereby sells, assigns, and transfers to Assignee and Assignee’s successors, legal representatives and assigns, all right, title and interest, in and to: the Invention(s), the Application, and any Patents; any divisionals, continuations, and continuations-in-part of the Application, and any other application claiming priority rights from the Application; the right to any past, present, or future damages for infringement of such Patents (including, e.g., provisional rights under 35 U.S.C. 154(d)); the right to file foreign and Patent Cooperation Treaty (PCT) applications directly in the name of Assignee; any reissues, reexaminations, or extension of any and all Patents; and the right to claim priority rights deriving from the Application (collectively, the “**Rights**”). Accordingly, the right, title and interest is to be held and enjoyed by Assignee and Assignee's successors, legal representatives and assigns, at least as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made. Assignor requests that the Commissioner of Patents issue any Patent of the Unites States that may be issued on the Invention(s) to Assignee.

2. *Assignor's Representations and Warranties.* Assignor hereby represents and warrants that Assignor owns the Rights and that the Rights are unencumbered. Assignor agrees not to sign any writing or to do any act conflicting with this agreement.

3. *Further Actions.* Assignor agrees, without further compensation or other consideration, to cooperate with Assignee and to execute and deliver all papers, instruments, and assignments, and perform any additional acts, as may be necessary to: vest all right, title and interest in and to the Rights in Assignee; perfect Assignee's enjoyment of the Rights; facilitate Assignee's enforcement and defense of the Rights (including, e.g., any litigation, interference proceedings, or inter partes review); or perfect or defend title to the Rights.

4. *Severability.* If any part or parts of this agreement shall be held unenforceable for any reason, the remainder of this agreement shall continue in full force and effect. If any provision of this agreement is deemed invalid or unenforceable by any court of competent jurisdiction, and if limiting such provision would make the provision valid, then such provision shall be deemed to be construed as so limited.

This assignment may be executed in counterparts.
