ASSIGNMENT

We, Jim Loveland, Leif Larson, Dan Christiansen, Tad Christiansen and Cam Christiansen declare that we have invented the invention described in United States Utility Application Serial No. _____, titled SYSTEMS AND METHODS FOR ADAPTIVE PROPERTY ANALYSIS VIA AUTONOMOUS VEHICLES, filed on December ____, 2016, in the United States Patent and Trademark Office, identified as Stoel Rives LLP Docket No. 59362/300. (We authorize Stoel Rives to fill in the application number and filing date when available.)

The Assignee, Loveland Innovations, LLC, a limited liability company of the State of Utah, having a place of business at 375 South Main Street, Suite 1, Alpine, Utah 84004, desires to secure the entire right, title and interest therein.

For good and valuable consideration, the receipt and sufficiency of which we hereby acknowledge, WE HEREBY ASSIGN TO THE ASSIGNEE:

The entire right, title and interest in said inventions in the above-identified United States patent application and in all divisions, continuations and continuations-in-part of said application, or reissues or extensions of Letters Patent or Patents granted thereon, and in all corresponding applications filed in countries foreign to the United States, and in all patents issuing thereon in the United States and Foreign countries.

The right to file foreign patent applications on said invention in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

We hereby authorize and request the United States Commissioner of Patents and Trademarks, and such Patent Office officials in foreign countries as are duly authorized by their

patent laws to issue patents, to issue any and all patents on said invention to the Assignee as the owner of the entire interest, for the sole use and benefit of the said Assignee, its successors, assigns and legal representatives.

We hereby agree, without further consideration and without expense to us, to sign all lawful papers and to perform all other lawful acts which the Assignee may request of us to make this Assignment fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, substitute, reissue, and other United States and foreign patent applications on said invention, and all lawful documents requested by the Assignee to further the prosecution of any of such patent applications.

Cooperation to the best of our ability in the execution of all lawful documents, the production of evidence, nullification, reissue, extension, or infringement proceedings involving said invention.

This assignment and agreement shall be binding upon our heirs and legal representatives.
