## ASSIGNMENT OF UNITED STATES PATENTS

This Assignment of United States Patents (this "Assignment") is effective the 6<sup>th</sup> day of November, 2003, between Moty Lev, an individual ("Assignor"), who is the owner of the entire right, title and interest in and to the United States patents, patent applications and industrial design registrations set forth in Appendix A and in the inventions claimed therein (collectively, the "Patents"), and Sidus Technologies, Inc., a corporation having an address at 5505 Walnut Circle West, West Bloomfield, Michigan ("Assignee"), who wants to acquire the entire right, title and interest in and to the aforesaid Patents and the inventions claimed therein.

Assignor and Assignee agree that Assignor's and Assignee's intent has always been, since at least November 6, 2003, when the provisional application (Serial No. 60/517,683), for which priority was claimed by the Patents, was filed at the U.S. Patent and Trademark Office, for all of Assignor's rights in the Patents to reside with Assignee, a corporation that is, and always has been, wholly owned by Assignor, and that both Assignor and Assignee have operated under the belief that, in fact, all of Assignor's rights in the Patents were assigned to Assignee at least by November 6, 2003. Assignor and/or Assignee are not presently able to locate executed documentation reflecting such assignment and thereby have agreed to execute this Assignment for avoidance of doubt and to memorialize and clarify the Parties' prior understanding and belief.

THEREFORE, for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor does hereby assign, transfer and convey to Assignee its entire right, title and interest in and to said Patents, all corresponding patents, patent applications, including in countries other than the United States, all reissues, divisions, continuations, including continuations-in-part, and extensions thereof, and to any Letters Patents which have or may issue based thereon and all benefits, privileges, causes of action, claims and remedies arising out of or relating to the Patents, the exploitation thereof, and the use and ownership of any of the Patents. Moreover, Assignor and Assignee agree that this Assignment shall replace any other document in existence prior to April 14, 2017 purporting to assign or transfer any rights relating to Patents between Assignor and Assignee and that any such document, to the extent its terms differ from this Assignment, is null and void.

This Assignment shall be construed, interpreted and applied in accordance with the laws of the State of Michigan

This Assignment may be amended or modified only by a written instrument signed by each Party.

IN WITNESS THEREOF, the parties have caused their respective names to be affixed hereto and this instrument to be signed by their duly authorized officers as of the day and year written below.
