WHEREAS, this agreement (the "**Assignment**") is executed within the framework of and pursuant to the execution of an Asset Purchase Agreement ("**Asset Purchase Agreement**") entered into on the date of this Assignment between the Parties and in accordance with which Assignee has purchased from Assignor certain technology assets of Assignor.

NOW, THEREFORE, and by virtue of the foregoing, the Parties are interested in entering into the Agreement and, mutually recognizing the necessary legal capacity of the other to contract and commit themselves for the purposes here stated, bring it into effect subject to the following

CLAUSES

1. Purpose

Assignor, in exchange for good and valuable consideration, the receipt of which is outlined in the Asset Purchase Agreement, hereby sells, assigns unto Assignee, its successors, and assigns, the entire right, title, and interest in the Invention, and any improvements thereto, said Patent Application and any and all letters patent which may be granted for said Invention in the United States of America and its territorial possessions and in any and all foreign countries, and in any and all provisional, divisions, reissues, re-examinations, and continuations thereof, including the right to file foreign applications directly in the name of Assignee and to claim priority rights deriving from the Patent Application to which said foreign applications are entitled by virtue of international convention, treaty or otherwise, said Invention, Patent Application, and all letters patent on said Invention to be held and enjoyed by Assignee and its successors and assigns for

their use and benefit and of their successors and assigns as fully and entirely as the same would have been held and enjoyed by Assignor had this assignment, transfer and sale not been made.

2. Obligations and representations of Assignor

A. Assignor authorizes and requests the Commissioner of Patents and Trademarks, as well as all other applicable patent offices throughout the world, to issue all letters patent on said Invention to Assignee.

B. Assignor further agrees to:

(i) cooperate with Assignee in the prosecution of the Patent Application and foreign counterparts;

(ii) execute, verify, acknowledge, and deliver all instruments and documents required for the making and prosecution of applications for United States and foreign letters patent on said Invention, for litigation regarding said letters patent, or for the purpose of protecting title to said Invention or letters patent therefor; and

(iii) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.

C. Assignor represents and warrants (i) that it has not granted and will not grant to others any rights inconsistent with the rights granted herein, and (ii) that the Patent Application to be assigned to Assignee is free from any liens, encumbrances and other third party interests.

Each Party shall be liable for those administrative penalties and damages caused by the breach of the obligations that the law provides for each Party.

Each Party agrees to indemnify the other for any and all losses, claims, liabilities or proceedings (including fines and penalties) in which the non-breaching party may incur as a result of any breach of any law or regulation on patents and/or industrial property rights due to failure of the offending party to comply with its obligations under such laws or regulations.

Assignor covenants and agrees that Assignor will communicate to Assignee, its successors, legal representatives, and assigns, any facts known to Assignor respecting the Invention or the Patent Application, and testify in any legal proceeding, assist in the preparation of any other patent property relating to the Patent Application and the Invention or any improvements made thereto, sign/execute all lawful papers, provide all requested documents, execute and make all rightful oaths and/or declarations in connection with the Patent Application and the Invention including any improvements made thereto, any patent applications filed therefrom, and any continuing application filed from any of the aforementioned applications, and generally do everything possible to aid Assignee, its successors, legal representatives, and assigns, to obtain and enforce proper patent protection for the Invention in all countries.
