The right, title and interest conveyed in this Assignment is to be held and enjoyed by Assignee as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made. The rights transferred include, without limitation, all rights granted to the sole owner of a patent under Title 35 of the United States Code, such as the right to prosecute, and receive all damages, royalties, awards and compensation for past, present and/or future infringement, and the right to use, make, sell, offer to sell, and/or import goods and/or services related to the Patent.
2. Assignor further agrees to:

3. Assignor represents and warrants that Assignor has not entered into any assignment, grant, mortgage, license, lien, or other agreement affecting the rights, titles, and interests to the invention and patent herein conveyed to Assignee.
4. Assignor represents and warrants that Assignor is the sole owner of all rights, title, and interest in the Patent and that Assignor has the authority to assign the entire invention and Patent.
5. Assignor represents and warrants that Assignor has no knowledge of facts or circumstances which would prevent Assignor's actions under the terms of this Assignment.
6. Assignor represents and warrants that Assignor has no knowledge of, and has not been notified of, facts that would indicate that the Patent is invalid or unenforceable, or that the assigned invention and Patent infringes the rights of any third party.

The undersigned having read this Assignment, and fully understanding the provisions of this Assignment, hereby executes this Assignment as of the Effective Date.
