## **PATENT ASSIGNMENT**

This PATENT ASSIGNMENT (this "Patent Assignment") is effective of April 8, 2016, by and between SafeWire, LLC, a Florida limited liability company, and Safe Wire Holding, LLC, a Florida limited liability company (individually, each as an "Assignor," and collectively, as the "Assignors"), and Orthovita, Inc., a Pennsylvania corporation (as assignee of Howmedica Osteonics Corp., a New Jersey corporation) ("Assignee").

WHEREAS, the Assignors hold the entire right, title, and interest in and to the patents and patent applications listed on the attached Patent Schedule (collectively, the "Patents");

WHEREAS, the Assignors and Assignee have entered into a separate agreement pursuant to which the Assignors, along with others, agreed to sell to Assignee, and Assignee agreed to purchase from the Assignors, the Assignors' entire right, title, and interest in the Patents (the "Separate Agreement"), and Assignee desires to secure the entire right, title and interest in the Patents.

NOW, THEREFORE, be it known by all whom it may concern, that for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged,

1. The Assignors agree to and hereby do assign, transfer and set over to Assignee, its successors and assigns, and Assignee hereby accepts, all of the Assignors' entire right, title and interest in and to the Patents, to have and to hold the same, unto Assignee for its own use and enjoyment and for the use and enjoyment of its successors and assigns, for the full term or terms of all such rights, including the right to sue for and collect past damages. The assignment of the Patents shall include the right to file domestic patent applications (including all letters patent, design patents, provisional applications, reissues, divisions, continuations, continuations-in-part, renewals, substitutes, patent disclosures and extensions of any patent or patent application), under the laws of the United States and all other countries that claim the benefit of any of the foregoing applications, and to file foreign patent applications in the name of Assignee or its affiliates, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.
2. The Assignors hereby authorize and request the United States Commissioner of Patents, and the Patent Office officials in foreign countries as are duly authorized by the respective foreign patent laws to issue patents, to issue any and all patents directed to the Patents to Assignee as the owner thereof.
3. The Assignors hereby agree, without further consideration and without expense to Assignee, to sign all documents and to perform all other lawful acts which Assignee may reasonably request to make this assignment of the Patents fully effective.
4. Except as provided for in Sections 2 and 3 hereof, nothing in this Patent Assignment shall alter any liability or obligation of the Assignors or Assignee arising under the Separate Agreement, which shall govern the representations, warranties and obligations of the

parties with respect to the Patents. In the event of any conflict or ambiguity between the terms hereof and the terms of the Separate Agreement, the terms of the Separate Agreement shall govern and be controlling.

5. This Patent Assignment shall be governed by, and construed in accordance with the laws of the State of Delaware, excluding any conflicts or choice of law rule or principle that might otherwise refer construction or interpretation of this Patent Assignment to the substantive law of another jurisdiction.
6. This Patent Assignment may be executed and delivered (including electronically) in one or more counterparts, and by the parties in separate counterparts, each of which when executed shall be deemed to be an original, but when taken together shall constitute one and the same agreement.
