WHEREAS, Assignor and Zebra Technologies Corporation ("Purchaser") are parties to a Master Acquisition Purchase Agreement dated as of April 14, 2014, as amended (the "Acquisition Agreement") and an Intellectual Property Agreement dated as of April 14, 2014, as amended (the "IP Agreement"), providing, subject to the terms and conditions set forth therein, for the sale, transfer, assignment, conveyance and delivery by Assignor to Assignee of all of Assignor's right, title and interest in and to all Assigned IP (as such term is defined in the IP Agreement) and all Ancillary IP Rights (as such term is defined in the IP Agreement) with respect thereto, as set forth in the IP Agreement;

WHEREAS, the Assigned IP includes the Assigned Patents identified on the attached Schedule A; and

WHEREAS, Assignee is, and has been, the sole owner of all beneficial right, title and interest in and to such Assigned Patents;

WHEREAS, Assignor is the owner of mere legal title and interest in and to such Assigned Patents;

WHEREAS, Assignor, Assignee and Purchaser desire to consolidate in Assignee the ownership of all beneficial and legal right, title, and interest in and to such Assigned Patents; and

WHEREAS, in accordance with the IP Agreement, effective as of immediately following the Merger, Assignor desires to sell, assign, transfer, convey and deliver to Assignee, and Assignee desires to purchase, acquire and accept the Assigned Patents identified on Schedule A; and

1. Definitions. Capitalized terms used in this Assignment but not otherwise defined herein have the meanings ascribed to them in the IP Agreement or the Acquisition Agreement, as applicable.
2. Assignment. Effective as of immediately following the Merger, Assignor hereby irrevocably sells, conveys, transfers, delivers and assigns to Assignee all of Assignor's worldwide right, title and interest in and to the Assigned Patents identified on Schedule A and all

Ancillary IP Rights with respect thereto, together with all rights of Assignor to the inventions of said Patents, and to all patents, patent applications (including provisional patent applications and nonprovisional patent applications), industrial design rights (including utility model rights, design rights, and industrial property rights), registrations and applications for registration of industrial design rights, patents of importation/confirmation, statutory invention registrations, and certificates of invention and like statutory right, all counterparts, continuations, divisions, continuations-in-part, revisions, extensions, supplementary certificates, substitutions, reexaminations, renewals, and reissuances of any of the foregoing and any patent or patent application that claims priority to any of the foregoing based in whole or in part, together with every priority right that is or may be predicated upon or arise from said inventions, patents, or patent applications. Assignor further assigns to Assignee all of the following in any jurisdiction throughout the world to the extent that such rights reside in Assignor: (i) rights to pursue and collect damages, costs, injunctive relief and other remedies for past, current or future infringement, misappropriation, or conflict with such Assigned Patents; (ii) royalties, fees, income and other payments and proceeds due or accrued as of the Effective Date and thereafter under or arising from such Assigned Patents; and (iii) to apply in any or all countries of the world for patent protection for the Assigned Patents.

3. Further Assurances. Assignor agrees that from time to time, at the reasonable request and expense of Assignee, it shall execute and deliver such other documents and take such other actions as Assignee may reasonably request to effectuate the transactions contemplated by this Assignment (including any documentation to perfect or record the rights granted hereunder in the Assigned Patents in any jurisdiction throughout the world).
