ASSIGNMENT

WHEREAS, Loic Pierre Deleyrolle, residing at 8238 SW 72nd Place, Gainesville, FL 32608 and Brent Allan Reynolds, residing at 2210 NW 28th St., Gainesville, Florida 32605, have invented certain new and useful subject matter for which applications for United States letters patent were filed on March 24, 2015, as Serial No. 62/137,535 and March 23, 2016, as Serial No. 15/078,590, entitled DIETARY AND NATURAL PRODUCT MANAGEMENT OF NEGATIVE SIDE EFFECTS OF CANCER TREATMENT (the "Inventions").

WHEREAS, by virtue of our employment, appointment, or affiliation with the University of Florida (the "University") and pursuant to the Intellectual Property Policy of and our Intellectual Property Agreement with the University, we have assigned all our rights in the Inventions to the University or its assignee or designee;

WHEREAS, the University has designated the University of Florida Research Foundation, Incorporated (the "Foundation"), existing by virtue of the laws of the State of Florida and having an office at 223 Grinter Hall, Gainesville, Florida 32611, to be the assignee of its entire right, title and interest in the Inventions;

THEREFORE, for valuable consideration, the sufficiency and receipt of which we hereby acknowledge, we confirm and ratify the sale, assignment, and transfer to the Foundation, its successors and assigns, all our rights in the above Inventions, and all other patent applications and patents for the Inventions which may be applied for or granted, including, all divisional, continuing, substitute, renewal, reissue, reexamination, counterpart, substitute, extension, and all other applications for letters patent which are or have been filed for the Inventions in the United States, its territorial possessions, and all foreign countries and in all patents and extensions which may be granted for the Application.

We hereby authorize and request patent office officials in the United States and in all foreign countries to issue any patents in the Inventions when granted to the Foundation as the assignee of our entire right, title, and interest in the patents.

We hereby assign to the Foundation, its successors and assigns, all of our rights to sue for and recover damages and profits arising from past infringements or unauthorized use of any patent that issues on the Inventions or unpaid royalties with respect to use of any rights in the Inventions occurring before the execution date of this Assignment.

We also agree that, in regard to the Inventions, we will communicate to the Foundation or its representatives any facts known to us; testify in any legal proceedings; sign all lawful papers; execute all divisional, continuing, substitute, renewal, reissue, and other applications for letters patent; execute all necessary papers; make all rightful oaths; and generally do everything possible to aid the Foundation, its successors and assigns, to obtain and enforce proper protection for the Inventions in the United States, its territorial possessions, and all foreign countries.
