WHEREAS, Assignee desires to obtain all of Assignors' right, title and interest in and to the Inventions and Application throughout the world.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignors and Assignee, intending to be legally bound, hereby agree as follows:

Assignors do hereby irrevocably sell, assign, transfer, convey, deliver and set over to Assignee any and all rights, title, and interest throughout the world that Assignors may own or claim to own in the Inventions and Application, any inventions claimed or described in the Application, the rights of priority thereto, any patent applications, patents, utility models or other similar registrations claiming priority or otherwise corresponding to the Inventions and Application, and any reexaminations, reissues, divisionals, continuations and continuations-in-part claiming priority from the aforesaid, together with all additions thereto, substitutions therefor and modifications thereof, and including the subject matter of all claims which may be obtained therefrom, the same to be held and enjoyed by Assignee for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, to the end of the term or terms for which said patent or patents are or may be granted or reissued as fully and entirely as the same would have been enjoyed by Assignors if this assignment, sale and transfer had not been made; together with all claims for damages by reason of infringement of said patent or patents, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives.
