This assignment includes assignment to Chamberlain of all patent and patent convention and treaty rights of all kinds, including the right to claim priority from any patent applications created regarding the Innovations, and all rights in and to any utility model, continuation, continuation-in-part, and divisional application therefrom, and any reissue or re-examination as to any patent issuing therefrom, in all countries throughout the world, for all such subject matter described therein.

This assignment further includes assignment to Chamberlain of all rights of action and rights to recover damages for past and future infringements of any of the assigned rights to the Innovations. This assignment further includes assignment to Chamberlain of all goodwill built up in any trademark rights assigned to Chamberlain.

I agree that on request and without further consideration, I will communicate to Chamberlain or its representatives or nominees any facts known to me respecting the Innovations and testify in any legal proceeding, make all rightful oaths, sign all lawful papers, and execute all instruments or documents required or requested for the making and prosecution of any legal rights in the Innovations including applications of any type for trademark, copyright, patent, utility model, industrial design, or other similar rights in all countries including, but not limited to, any provisional, non-provisional, continuation, continuation-in-part, divisional, renewal or

I further agree that as part of my obligation to maintain all legal rights to the Innovations, I must maintain all information regarding the Innovations strictly confidential and secret.
