**WHEREAS, Click Diagnostics, Inc.**, a corporation duly organized under and pursuant to the laws of Delaware, and having its principal place of business at 625 River Oaks Parkway, San Jose, CA 95134 (the "Assignee"), is desirous of acquiring the entire right, title, and interest in: the Invention; the Application(s) for patent identified above; the right to file applications for patent of the United States or other countries on the Invention; any application for patent of the United States or other countries claiming priority to the Application(s); any provisional or other right to recover damages, including royalties, for prior infringements of the Application(s); and any patent of the United States or other countries that may be granted therefor or thereon.

**WHEREAS**, an assignment executed on April 15, 2016 by assignor Jesus Ching, and on April 27, 2016 by the remaining eight assignors named above, with respect to Nonprovisional Application No. 14/984,573 and PCT Application No. PCT/US2015/068101 ("the April 2016 Assignment") incorrectly identified the Assignee as "Click Diagnostics" and not "Click Diagnostics, Inc." The Assignors hereby confirm that the Assignors, via the April 2016 Assignment, intended to and previously did assign, transfer, and/or set over to the Assignee identified above, Click Diagnostics, Inc., and its successors and assigns, the Assignors' entire rights, title and interest in the subject matter and Invention(s) disclosed in said Application(s).

To the extent that the Assignors have retained or not previously assigned, transferred, and/or set over any rights, title and/or interest in said Application(s) and/or said Invention(s), the Assignors hereby assign, transfer, and set over any such rights, title and/or interest in:

- (a) the Invention(s);
- (b) the Application(s) for patent identified above;
- (c) the right to file applications for patent of the United States or other countries on the Invention(s), including all rights under the Hague Convention, the Paris Convention for the Protection of Industrial Property and under the Patent Cooperation Treaty, and all rights of claiming priority in any country of the world;
- (d) any application(s) for patent of the United States or other countries claiming the Invention(s);
- (e) any application(s) for patent of the United States or other countries claiming priority to, and/or the benefit of, at least one of the Application(s) for patent identified above or any application(s) for patent claiming the Invention(s), including any substitute application(s), division(s), continuation(s), and continuation(s)-in-part;
- (f) any provisional or other right to recover damages, including royalties, for prior infringements of any application for patent identified in the preceding paragraphs (b)-(e); and
- (g) any patent(s) of the United States or other countries that may be granted for or on any application for patent identified in the preceding paragraphs (b)-(e), including any reissue(s), reexamination(s), revival(s), renewal(s), and extension(s) of said patent(s).

The above-granted rights, titles, and interests are to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, as fully and entirely as the same would have been held and enjoyed by the Assignor had this sale and assignment not been made.

The Assignor hereby represents to the Assignee, its successors, legal representatives, and assigns, that, if the Assignors have retained any rights after the execution of the April 2016 Assignment, then at the time of execution and delivery of these presents, the Assignor is a lawful owner of an undivided interest in the entire right, title, and interest in and to the Invention(s), that the Invention(s) are unencumbered, except, if applicable, by obligation to assign in accordance with said prior agreement or the April 2016 Assignment, and that the Assignor has good and full right and lawful authority to sell and convey the same in the manner set forth herein, and that Assignor will not make or enter into any assignment, sale, agreement or encumbrance which would conflict with these presents.

The Assignor hereby covenants and agrees to and with the Assignee, its successors, legal representatives, and assigns, that the Assignor will sign all papers and documents, take all lawful oaths, and do all acts necessary or required to be done in connection with any and all proceedings for the procurement, maintenance, enforcement and defense of the Invention(s), said Application(s), and said patents, including interference and derivation proceedings, and any post-grant proceedings (e.g., opposition proceedings, post-grant reviews, *inter partes* reviews, supplemental examinations, etc.) without charge to the Assignor, its successors, legal

representatives, and assigns, but at the cost and expense of the Assignee, its successors, legal representatives, and assigns.

The Assignor hereby requests the Commissioner of Patents to issue said patents of the United States to the Assignee for the sole use and behalf of the Assignee, its successors, legal representatives, and assigns.
