PATENT ASSIGNMENT COVER SHEET

Electronic Version v1.1
Stylesheet Version v1.2

EPAS ID: PAT4494682

SUBMISSION TYPE:	NEW ASSIGNMENT
NATURE OF CONVEYANCE:	ASSIGNMENT

CONVEYING PARTY DATA

Name	Execution Date
COMMSCOPE EMEA LIMITED	08/28/2015

RECEIVING PARTY DATA

Name:	COMMSCOPE TECHNOLOGIES LLC
Street Address:	1100 COMMSCOPE PLACE SE
City:	HICKORY
State/Country:	NORTH CAROLINA
Postal Code:	28602

PROPERTY NUMBERS Total: 1

Property Type	Number
Application Number:	15642016

CORRESPONDENCE DATA

Fax Number: (952)465-0771

Correspondence will be sent to the e-mail address first; if that is unsuccessful, it will be sent using a fax number, if provided; if that is unsuccessful, it will be sent via US Mail.

Phone: 9524650770
Email: docketing@fogglaw.com
Correspondent Name: FOGG & POWERS LLC
Address Line 1: 4600 W 77TH ST
Address Line 2: SUITE 305
Address Line 4: MINNEAPOLIS, MINNESOTA 55435

ATTORNEY DOCKET NUMBER:	100.1259US02
NAME OF SUBMITTER:	DANIELLE N. SUESS
SIGNATURE:	/Danielle N. Suess/
DATE SIGNED:	07/08/2017

Total Attachments: 997

PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT (the "Assignment"), effective as of August 28, 2015 (the "Effective Date"), is entered into by and between:

CommScope EMEA Limited, a company organized and existing under the laws of Ireland with its principal office at Corke Abbey Avenue, Bray, County Wicklow, Ireland ("Assignor"), and

CommScope Technologies LLC, a company organized and existing under the laws of the State of Delaware having its principal office at 1100 CommScope Place SE, Hickory, North Carolina 28602, United States of America ("Assignee").

(Assignor and Assignee are collectively referred to as the "Parties" and individually referred to as "Party"). Capitalized terms used but not defined herein shall have the meaning set forth in the Purchase Agreement (defined below).

RECITALS

WHEREAS, Assignor has acquired intellectual property rights pursuant to a Stock and Asset Purchase Agreement by and between TE Connectivity LTD., CommScope Holding Company, Inc., and CommScope, Inc. dated January 27, 2015 and related agreements, including Patent Assignment Agreements dated as of August 28, 2015 between Assignor and each of Tyco Electronics Raychem GmbH, The Whitaker LLC, AMP Products Pacific Ltd, and Tyco Electronics Services GmbH (collectively, the "Purchase Agreement");

WHEREAS, Assignor and Assignee entered into an Intellectual Property Assignment Agreement dated as of August 28, 2015 ("IP Agreement");

WHEREAS, Assignor owns the Patents set forth on Schedule 1 Part A hereto ("Assigned Patents") and the registered design rights set forth on Schedule 1 Part B hereto ("Assigned Designs") and desires to sell, transfer, convey, and assign to Assignee, and Assignee desires to acquire and accept from Assignor, the Assigned Patents and the Assigned Designs, subject to Assignor's reservation of certain rights to the Intellectual Property as defined in the IP Agreement.

NOW, THEREFORE, for good and valuable consideration provided for in the IP Agreement, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. Assignment. Subject to the terms and conditions of the IP Agreement, Assignor hereby irrevocably assigns, conveys, transfers and delivers to Assignee, and Assignee hereby accepts, all of Assignor's entire, worldwide (for all jurisdictions throughout the world, including all countries and political entities) right, title and interest in and to:

(a) the Assigned Patents, together with all corresponding counterpart patents and patent applications thereof, and including all continuation, divisional, continuation-in-part, continued prosecution applications, and provisional applications, any patents or reissued or re-examined patents resulting from any of the foregoing in any jurisdiction and any extensions thereof, and the priority rights thereto for all jurisdictions; and

(b) the Assigned Designs,

in each case, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all income, royalties or payments due, accrued, or payable as of the Effective Date or thereafter, including, without limitation, any and all claims or causes of action for profits and damages by reason of past, present or future infringement or other unauthorized use of any of the Assigned Patents and Assigned Designs, with the right to enforce and sue for, and recover or collect the same for Assignee's own use and enjoyment and for the use and enjoyment of its successors, assigns or other legal representatives.

2. Governing Law. This Assignment shall be governed by and construed in accordance with the Laws of the State of North Carolina, without regard to the conflicts of law principles of such state.

3. Successors and Assigns. This Assignment shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and assigns.

4. Counterparts. This Assignment may be executed in one or more counterparts and delivered via facsimile, pdf, or other electronic means, each of which shall be deemed an original as against the party that signed it and all of which shall together constitute one and the same agreement, and shall become effective when one or more counterparts have been signed by each of the Parties and delivered to the other Party, it being understood that all Parties need not sign the same counterpart.

5. Further Assurances. Assignor agrees that from time to time, at the reasonable request of Assignee and at Assignee's expense, Assignor shall execute and deliver such other documents and take such other actions as Assignee may reasonably request to effectuate Assignor's assignment, transfer, and conveyance of the Assigned Patents and Assigned Designs, of this Assignment and the transactions contemplated by this Assignment (including any documentation to perfect and record the rights granted hereunder in the Assigned Patents and Assigned Designs, in any jurisdiction through the world). Assignor acknowledges and agrees that Assignee may perfect and record this Assignment or such other documentation in any jurisdiction throughout the world, and that Assignor shall cooperate therewith. The Assignee hereby requests and the Assignor hereby grants to the Assignee and its legal representatives all rights necessary to record this Assignment or such other documentation with the United States Patent and Trademark Office and any similar intellectual property office or government agency in any jurisdiction throughout the world. Assignor does hereby make, constitute and appoint

Assignee (and any officer or agent of Assignee as Assignee may select in its exclusive discretion) as Assignor's true and lawful attorney-in-fact, with the power to endorse Assignor's name on all applications, documents, papers and instruments solely as necessary to implement and effect fully the express intentions, purposes and provisions of this Assignment, including, but not limited to, the filing of any instrument of assignment and documents related thereto to effect such assignment in the United States Patent and Trademark Office and other patent offices and intellectual property governmental offices in any jurisdiction throughout the world; provided, however, that Assignee shall only be entitled to exercise its rights under this power of attorney with respect to any of the foregoing actions to the extent that Assignor has failed to take such action at the request of Assignee and following ten (10) days prior written notice to Assignor of the exercise of such rights. This power of attorney shall be irrevocable.

[remainder of page intentionally left blank with signatures to follow on subsequent pages]

IN WITNESS WHEREOF, the Parties have caused this Assignment to be executed by their duly authorized representatives effective as of the Effective Date.

	80-130	US	Universal connector for a solderless, screwless and stripless system for testing, connecting and isolating conductor tracks	267,847	5/28/81	4,410,225	10/18/83
	81-135	US	Device for making a solderless, non-screwed and unstripped single or multiple contact at a terminal element.	409,370	8/19/82	4,533,196	8/6/85
	82-030	US	Modular plug connector	745,319	6/14/85	4,634,209	1/6/87

Case Number	Previous Case Number / Docket #	Country	Application Title	Application #	Filing Date	Patent #	Issue Date
	82-035	US	Terminal element for cable wires and drop wire cables	734,770	5/15/85	4,580,870	4/8/86
	83-040	US	A terminal strip	593,131	3/26/84	4,615,576	10/7/86
	83-140	US	A cable distribution head	577,265	2/6/84	4,607,135	8/19/86
	83-142	US	A heat protection device for over-voltage arrester magazines	618,997	6/11/84	4,642,723	2/10/87
	84-147	US	Connector block with solderless, non-screwed and stripping-free terminals having a polytropic air cap for terminating communication cables and dropwire cables	632,210	7/18/84	4,541,682	9/17/85
	84-148	US		763,010	8/6/85	4,800,557	1/24/89
	85-003	US		872,403	6/10/86	4,716,651	1/5/88
	86-019	US	Connector bank for cable wires, in particular for telephone cables	37,703	4/13/87	4,790,770	12/13/88
	86-066	US	Cutting/clamping terminal element for electrical conductors	118,431	11/6/87	4,806,119	2/21/89
	86-069	US	Device for connecting cable wires to cutting/clamping contacts of dropwire connector banks of telecommunication systems	128,430	12/3/87	4,822,300	4/18/89
	87-003	US		170,881	3/21/88	4,897,040	1/30/90
	87-157	US	Distribution bank for commuication cables	174,724	3/29/88	4,851,967	7/25/89
	88-006	US		184,290	4/21/88	4,882,771	11/21/89
	88-092	US		257,388	10/13/88		
	88-094	US		PCT/DE89/00488	7/26/89	5,287,454	2/15/94
	88-095	US	Contact member of electrical conductors	389,854	8/4/89	4,973,262	11/27/90
	88-098	US	Plug connector for telecommunication and data systems	444,762	12/1/89	4,986,768	1/22/91
	89-005	US	Protection plug for connector banks of telecommunication and data systems	495,793	3/16/90	5,157,580	10/20/92
	89-006	US	Connector banks with voltage surge protection	512,808	4/23/90	5,086,368	2/4/92
	89-010	US	Wire connector for cable wires, in particular of telecommunication cables	605,952	10/30/90	5,192,223	2/4/92
	89-101	US	Plug connector	463,376	1/11/90		
	89-102	US	Shield connecting element for a connector bank	469,948	1/25/90	5,000,703	3/19/91
	90-002	US	Voltage limiter	645,467	1/24/91	5,172,295	12/15/92
	90-004	US			3/12/91		

Case Number	Previous Case Number / Docket #	Country	Application Title	Application #	Filing Date	Patent #	Issue Date
	90-006	US	Connecting block for the telecommunication and data technology	668,195	3/12/91	5,114,356	5/19/92
