ASSIGNMENT

Hartley Campbell Atkinson, residing in Auckland, New Zealand, and Brendon John Woodhead, residing in Auckland, New Zealand, both citizens of New Zealand (each an "Assignor," collectively "Assignors"), are the inventors of

A Nasal Medication Delivery Device

for which U.S. Patent Application Serial Number 15/553,801 was filed on August 25, 2017 ("Patent Application"). The above-identified Patent Application claims priority to international application no. PCT/NZ2016/050002, which was filed on January 8, 2016, which in turn claims priority to New Zealand patent application no. 706864, which was filed on April 9, 2015.

AFT Pharmaceuticals Limited, a company organized under the laws of New Zealand, having a principal place of business at Level 1, 129 Hurstmere Road, Takapuna, Auckland 0622, New Zealand ("Assignee"), is desirous of acquiring the entire right, title and interest in and to said invention, all applications for and all letters patent issued on said invention, including, but not limited to, the Patent Application and any reissues or extensions that may be granted.

Therefore, for good and valuable consideration, the receipt and sufficiency of which is acknowledged, Assignors, intending to be legally bound, do hereby sell, assign and transfer to Assignee and Assignee's successors, assigns and legal representatives the entire right, title and interest in said invention and all patent applications thereon, including, but not limited to, the Patent Application identified above, as well as such rights in any divisions, continuations in whole or part, substitute applications, regular United States federal applications, and any and all foreign applications, including all reissues and reexaminations thereof, throughout the world, including the right to claim priority under the Paris Convention or other treaty, to Assignee for the entire term of the Patent Application and any future patent that may issue for said invention and for the entire terms of any and all foreign patents that may issue from foreign applications.

Assignors authorize the United States Patent and Trademark Office to issue any patents resulting from the Patent Application or claiming priority to the Patent Application to Assignee. The right, title, and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignors had this assignment not been made.

Assignors further agree to be legally bound, upon request of Assignee, to: (a) cooperate with Assignee in the prosecution of the Patent Application, a regular United States federal application, and any foreign counterparts; (b) supply all information and evidence relating to the making and practice of said invention; (c) testify in any legal proceeding relating to said invention; (d) execute all instruments proper to patent the invention throughout the world for the benefit of Assignee; (e) execute all instruments proper to carry out the intent of this instrument; and (f) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.

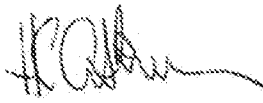

Assignors warrant that the rights and property conveyed herein are free and clear of any encumbrance.
