PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT ("Patent Assignment"), dated as of MAY 1, 2016 (the "Effective Date"), is made by KIEREN PATEL ("Assignor"), a CALIFORNIA RESIDENT, located at 224 19TH STREET, in favor of OPTICENT HEALTH DEVICE, INC. ("Assignee"), a DELAWARE CORPORATION, located at 820 DAVIS STREET #128, EVANSTON, IL 60201 in connection with the transfer of certain assets of Assignor to Assignee pursuant to a TECHNOLOGY ASSIGNMENT AGREEMENT between Assignor and Assignee, dated as of OCTOBER 1, 2015 (the "Principal Agreement").

WHEREAS, under the terms of the Principal Agreement, Assignor has conveyed, transferred and assigned to Assignee, among other assets, certain Assigned Patents (as defined herein), and has agreed to execute and deliver this Patent Assignment in a form recordable with United States authorities including, but not limited to, the US Patent and Trademark Office (USPTO), and other national and supranational governmental authorities.

WHEREAS, Assignee wishes to obtain all of Assignor's right, title and interest in and to the Assigned Patents (as defined herein) and Assignor's entire right, title and interest in the Licenses (as defined herein).

NOW THEREFORE, Assignor agrees/the parties agree as follows:

1. Assignment. In consideration of the receipt and sufficiency of which are hereby acknowledged, Assignor hereby irrevocably conveys, transfers and assigns to Assignee, its successors and assigns, and Assignee hereby accepts, all of Assignor's right, title and interest in, to and under the following (the "Assigned Patents"):

(a) the patents and patent applications listed in Schedule I hereto, all patents that issue from such patent applications, and all continuations, continuations-in-part, divisionals, extensions, substitutions, reissues, re-examinations and renewals, of any of the foregoing, and any patents or patent applications from which any of them claim priority or that claim priority from any of them, and all invention(s) disclosed and claimed in any of the foregoing (the "Patents"); and

(b) all rights, privileges and protections of any kind whatsoever of Assignor accruing under any of the Patents provided under the applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world, including, but not limited to, the right to file foreign patent applications and license recordings; and

(c) all rights, privileges and protections of any kind whatsoever of Assignor under any licenses, agreements or contract rights with respect to any of the Patents granted by Assignor to any third party; and

(d) any and all claims and causes of action, with respect to any of the Patents or Licenses, whether accruing before, on or after the Effective Date, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, misappropriation, violation, misuse, breach or default, with the right but no obligation to petition or sue for, or otherwise seek, such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recordation and Further Actions. Assignor authorizes the Commissioner for Patents for the USPTO and the appropriate officers of the USPTO and all other jurisdictions in which any of the Patents are or may be recorded, registered or pending, to record and register this Patent Assignment upon request by Assignee. Assignor shall execute any and all documents, including assignments, transfers and related powers of attorney, and take all other further actions as may be necessary or reasonably requested by Assignee to effect, record, perfect or enforce the transfers set forth in this Patent Assignment and ensure that all of Assignor's right, title and interest in and to the Patents and all of Assignor's rights, privileges and protections under the Licenses, and all registrations and recordings thereof, are properly assigned to Assignee, its successors and assigns in accordance with this Patent Assignment.

Without limiting any of the foregoing provisions of this Section 2, Assignor shall ensure that its employees, consultants, directors and agents testify in connection with any administrative or legal proceedings affecting any right, title, interest or benefit of Assignee in, to or under the Assigned Patents and perform any other acts as Assignee may deem reasonably necessary or desirable to carry out the intent of this Patent Assignment. Assignee shall reimburse Assignor for all costs reasonably incurred by Assignor in the performance of its obligations under this Section 2.

3. Representations and Warranties. Assignor hereby represents and warrants to Assignee that, as of the Effective Date:

(a) all required filings and fees related to the Patents have been timely filed with and paid to the USPTO and other relevant governmental authorities and authorized registrars, and all Patents are otherwise in good standing. Assignor has provided Assignee with true and complete copies of all file histories, documents, certificates, office actions, correspondence and other materials related to the filing, prosecution, and issuance of each of the Patents.

(b) the/to Assignor's knowledge, the Patents are valid and enforceable by Assignor in all applicable jurisdictions, and are not subject to any threat or claim to the contrary. Assignor owns all right, title and interest in and to the Patents, and the inventions and improvements disclosed and claimed therein, free and clear of liens, security interests and other encumbrances. Assignor is in full compliance with all legal requirements applicable to the Patents and Assignor's ownership and use thereof.

(c) Assignor has no knowledge of any reason to believe that any material claims of any patent applications included in the Patents will fail to receive the grant of a patent substantially in its current form or otherwise be materially altered or narrowed in scope; and

(d) Assignor is the sole and exclusive owner of all right, title and interest in, to and under the Licenses as the licensor, subject only to the rights and licenses of the licensees under the Licenses in accordance with their respective terms; and

(e) Assignor has provided Assignee with true and complete copies (or in the case of any oral agreements, a complete and accurate written description) of all Licenses, including all modifications, amendments and supplements thereto and waivers thereunder; and

(f) all the Licenses are valid, binding and enforceable between Assignor and the other parties thereto, and Assignor and such other parties are in full compliance with the terms and conditions of the Licenses; and

(g) Assignor possesses, and has the full right, power and authority to assign and transfer to Assignee all of Assignor's right, title and interest in and to the Assigned Patents; and

(h) to Assignor's knowledge, (i) no person has infringed, misappropriated or otherwise violated, or is infringing, misappropriating or otherwise violating, any of the Patents; and (ii) the practice of the Patents/the issued patents among the Patents as currently made by Assignor does not and will not infringe, misappropriate, dilute or otherwise violate the intellectual property or other rights of any third party or violate any applicable regulation or law.

4. Indemnification. Assignor shall defend, indemnify and hold harmless Assignee, its affiliates and their respective shareholders, directors, officers and employees from and against all claims, judgments, damages, liabilities, settlements, losses, costs and expenses, including attorneys' fees and disbursements, arising from or relating to any breach by Assignor of its representations, warranties or other obligations hereunder.

5. Disclaimers. Assignor makes no representations, warranties, covenants, agreements or indemnities, and hereby disclaims all implied warranties, with respect to the validity or enforceability of, or Assignor's or Assignee's ability to enforce or commercialize the Patents or obtain patent protection from any pending patent application included among the Patents.

The terms of the Principal Agreement, including, but not limited to, the representations, warranties, covenants, agreements and indemnities relating to the Assigned Patents are incorporated herein by this reference. The parties hereto acknowledge and agree that the representations, warranties, covenants, agreements and indemnities contained in the Principal Agreement are in addition to those set forth in this Patent Assignment, are not superseded hereby and shall remain in full force and effect to the full extent provided therein. In the event of any conflict or inconsistency between the terms of the Principal Agreement and the terms hereof, the terms of the Principal Agreement shall govern.

6. General.

(a) Entire Agreement. This Patent Assignment, together with the Principal Agreement, other agreements incorporated therein by reference and all related exhibits and schedules, constitute the sole and entire agreement of the parties with respect to the subject matter contained herein and therein, and supersedes all prior and contemporaneous understandings and agreements, both written and oral, with respect to such subject matter.
