PATENT
REEL: 043872 FRAME: 0926

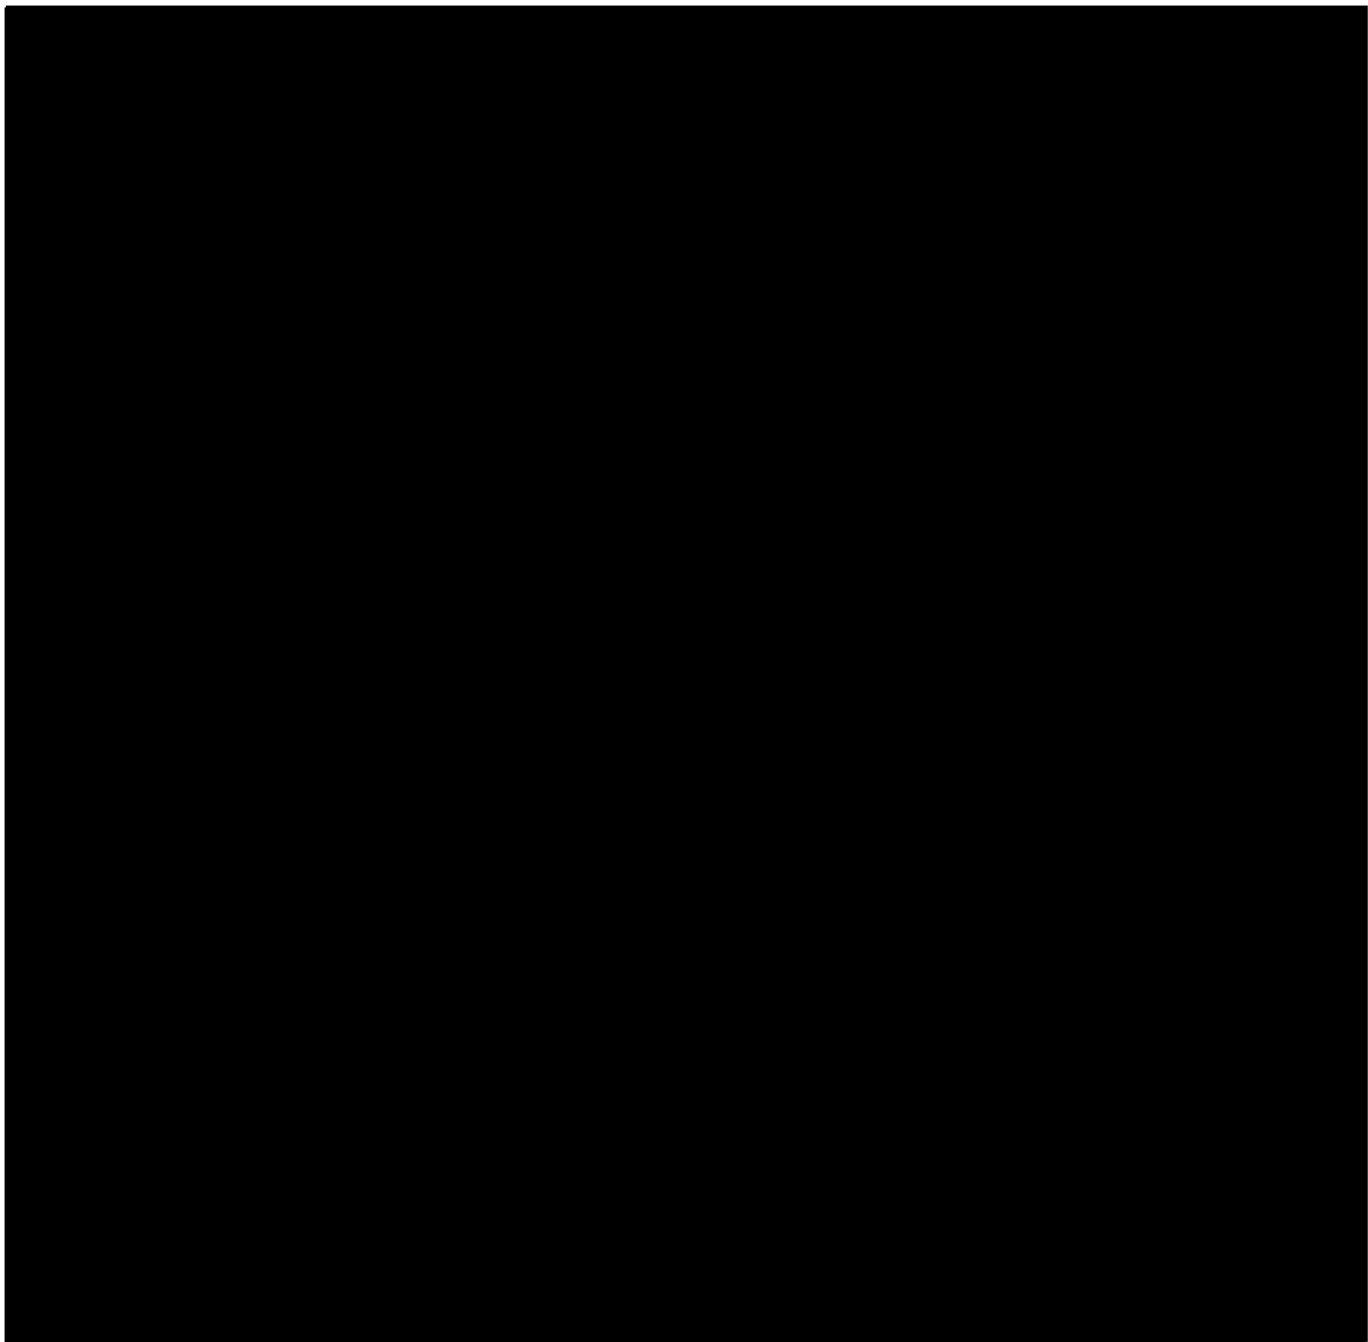

- (b) Assignment of Inventions. I agree that I will, without additional compensation, promptly make full written disclosure to the Company, will hold in trust for the sole right and benefit of the Company, and hereby assign to the Company, or its designee, all my right, title and interest throughout the world in and to any and all inventions, original works of authorship, developments, concepts, know-how, improvements or trade secrets, whether or not patentable or registrable under copyright or similar laws, which I may solely or jointly conceive or develop or reduce to practice, or cause to be conceived or developed or reduced to practice, whether or not during regular working hours, during the Employment Period, and with respect to Inventions in the Field of Interest (as defined in Section 6 below), for a period of one (1) year thereafter, provided they either (i) relate at the time of conception or development to the actual or demonstrably proposed business or research and development activities of the Company; (ii) result from or relate to any work performed for the Company; or (iii) are developed through the use of Confidential Information and/or Company owned resources or in consultation with Company personnel (collectively referred to as "Inventions"). I further acknowledge that all Inventions which are made by me (solely or jointly with others) within the scope of and during the Employment Period are "works made for hire" (to the greatest extent permitted by applicable law) for which I am, in part, compensated by my salary, unless regulated otherwise by law but that, in the event any such Invention is deemed not to be a work made for hire, I hereby assign all rights in such Invention to the Company. I further represent and agree that to the best of my knowledge and belief, the practice by the Company of any of the Inventions will not violate or infringe upon any right, patent, copyright, trademark or right of privacy, or constitute libel or slander against or violate any other rights of any person, firm or corporation, and that I will use my best efforts to prevent any such violation.

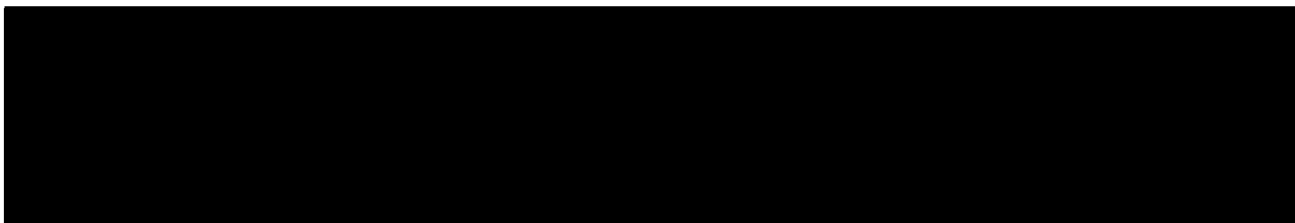

- (d) Intellectual Property Rights. I agree to assist the Company, or its designee, at the Company's expense, in every reasonable way to secure the Company's rights in the Inventions and any copyrights, copyright applications or registrations, patents, patent applications, trademarks, trademark applications, trade names, service marks, logos, database rights, algorithms, know-how, domain names, mask work rights, moral rights, or other intellectual property rights relating thereto in any and all countries, including the disclosure to the Company of all pertinent information and data with respect thereto, the execution of all applications, specifications, oaths, assignments, recordations, and all other instruments which the Company shall deem necessary in order to apply for, obtain, maintain and transfer such rights and in order to assign and convey to the Company, its successors, assigns and nominees the sole and exclusive right, title and interest in and to such Inventions, and any intellectual property or other proprietary rights relating thereto. I further agree that my obligation to execute or cause to be executed, when it is in my power to do so, any such instrument or papers shall continue after the termination of this Agreement until the expiration of the last such intellectual property right to expire in any country of the world. If the Company is unable because of my mental or physical incapacity or unavailability for any other reason to secure my signature to apply for or to pursue any application for any United States or foreign patents or copyright registrations covering Inventions or original works of authorship assigned to the Company as above, then I hereby irrevocably designate and appoint the Company and its duly authorized officers and agents as my agent and attorney in fact, to act for and in my behalf and stead to execute and file any such applications or records and to do all other lawfully permitted acts to further the application for, prosecution, issuance, maintenance or transfer of letters patent or registrations thereon with the same legal force and effect as if originally executed by me. I hereby waive and irrevocably quitclaim to the Company any and all claims, of any nature whatsoever, which I now or hereafter have for past, present or future infringement of any and all proprietary rights assigned to the Company.
