CONFIRMATORY PATENT ASSIGNMENT

THIS CONFIRMATORY PATENT ASSIGNMENT (this "Assignment") between Anton Van Arendonk, an individual residing in Irricana, Alberta, Canada ("Assignor"), and Teledyne DALSA, Inc., a corporation organized under the laws of Ontario, Canada, ("Assignee"), is effective as of the date it was executed by Assignor and Assignee (the "Effective Date").

WHEREAS, Assignor has, alone or in collaboration with others, invented one or more inventions relating to **SCINTILLATOR SEALING FOR SOLID STATE X-RAY DETECTOR** (hereinafter referred to as "Invention"), and described in U.S. Patent Application No. 15/354760, filed November 17, 2016, Attorney Docket No. 281026 (hereinafter referred to as "Application"); and

WHEREAS, Assignor did previously assign all Assignor's right, title, and interest in the Invention, the Application, and related patents and patent applications to Assignee and desires to confirm (and if needed make effective) said assignment and to execute and deliver this Assignment to Assignee for recording with governmental authorities including, but not limited to, the US Patent and Trademark Office.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree, intending to be legally bound, as follows:

1. Assignor hereby confirms that Assignor sold, transferred, assigned, conveyed, set over and delivered, and if prior actions and agreements were insufficient in that regard, hereby sells, transfers, assigns, conveys, sets over and delivers, to Assignee, its successors and assigns, and Assignee confirms that it has accepted and hereby accepts, all of Assignor's right, title and interest in and to the following (the "Assigned Patents"):

- (a) the Invention;
- (b) the Application and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations and renewals thereof;
- (c) all rights of any kind whatsoever of Assignor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world;
- (d) any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and
- (e) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on and/or after the Effective Date, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, misappropriation, violation, misuse, breach or default, with the right but not the obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Assignor hereby authorizes and requests the United States Commissioner of Patents and Trademarks and the proper officials of all other countries to record this Assignment upon

request of Assignee. At Assignee's cost and expense, Assignor shall take such steps and actions following the Effective Date, including the execution of any documents, files, registrations, or other similar items, to ensure that the Assigned Patents are assigned to Assignee, or any assignee or successor thereto.
