ASSIGNMENT

WHEREAS: **Thomas RUCHATZ**, residing at Im Flath 7, 38542 Leiferde, Germany (DE), and **Thorsten BAGDOANT** residing at Mittelweg 96, 38106 Braunschweig, Germany (DE) (hereinafter collectively referred to as **ASSIGNORS**) have each made an inventive contribution to an invention entitled "Lidar-Sensor and method for optical scanning of an environment" (hereinafter referred to as **INVENTION**), as set forth in an application for U.S. patent entitled "Lidar-Sensor and method for optical scanning of an environment", application number 15/787728, filed on October 19, 2017 (hereinafter referred to as **APPLICATION**);

WHEREAS, Volkswagen Aktiengesellschaft, organized and existing under the laws of Germany (DE), having a place of business at Berliner Ring 2, 38440 Wolfsburg, Germany, (DE) (hereinafter referred to as **ASSIGNEE**) is desirous of acquiring the full and exclusive right, title, and interest in, to, and under the **INVENTION** and the **APPLICATION**;

NOW THEREFORE, for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, each **ASSIGNOR** hereby sells, assigns, and transfers to the **ASSIGNEE** his full and exclusive right, title, and interest in the United States (including its territories and dependencies) and all countries foreign thereto in, to, and under the **INVENTION** (including provisional, non-provisional, utility, divisional, continuing, and reissue applications, and any applications claiming priority from the **INVENTION**, that are based in whole or in part on the **INVENTION**), and any patents (including extensions thereof) of any country that have been or may be granted on the **INVENTION** or any part thereof, and including any right to priority to any patent and patent applications based on the **INVENTION**;

Each **ASSIGNOR** hereby authorizes and requests the Commissioner for Patents of the United States of America to issue any and all United States Patents that may be granted on the aforesaid applications or any part thereof, in the name of the **ASSIGNEE**;

Each **ASSIGNOR** hereby grants the attorney or agent of record the power to insert on this agreement any further identification that may be necessary or desirable in order to comply with the rules of the United States Patent and Trademark Office for recordation of this document.

In the event that **ASSIGNEE** is unable, after reasonable effort, to secure any **ASSIGNOR**'s signature on any application, paper, or other instrument relating to any patent, patent application, letters patent, copyright, or other analogous protection relating to the **INVENTION** in any country, whether because of the **ASSIGNOR**'s mental incapacity, death, or for any other reason whatsoever, said **ASSIGNOR** hereby irrevocably designates and appoints said **ASSIGNEE** and its duly authorized officers and agents as said **ASSIGNOR**'s agent and attorney in fact to act for and to execute and file any such application, paper, or other instrument on said **ASSIGNOR**'s behalf, and to do all other lawfully permitted acts to further the prosecution and issuance of any patent, patent application, letters patent, copyright, or any other analogous protection related to the **INVENTION**, with the same legal force and effect as if executed by said **ASSIGNOR**.

Each **ASSIGNOR** hereby covenants that no assignment, sale, agreement, or encumbrance has been or will be made or entered into which would conflict with this sale, assignment, and transfer, and that said **ASSIGNOR** has the right, title, and interest to convey as set forth herein; **AND**

Each ASSIGNOR further covenants that upon ASSIGNEE's request, he will promptly provide to ASSIGNEE all pertinent facts and documents relating to the aforesaid applications and patents. Each ASSIGNOR agrees to testify as to the same in any interference or litigation related thereto, and will promptly execute and deliver to said ASSIGNEE, or its legal representatives, or its successor, without further consideration, any and all papers, instruments, or affidavits required to apply for, obtain, maintain, and enforce any patent granted on the aforesaid INVENTION, as may be deemed necessary or desirable by said ASSIGNEE to carry out its duly authorized purposes.
