ASSIGNMENT BY INVENTORS

This Assignment is by the following individuals (the "Assignors"):

- Paul Lott; and
- Yuan Ji.

The Assignors invented one or more certain inventions (the "Invention(s)") described in an application for Letters Patent of the United States titled "EDDY CURRENT PIPELINE INSPECTION USING SWEEPED FREQUENCY," filed on December 14, 2017 as U.S. Patent Application No. 15/841,714 (the "Application"). The Assignor authorizes the Assignee, identified below, or its representatives to insert the application number of the Application when known

Exxam Systems, LLC, having its principal place of business at 6714 McGill Way, Anchorage, AK 99502 (the "Assignee"), desires to acquire the entire right, title and interest in and to the Invention(s) and the Application, and in and to any patents (collectively, "Patents") that may be granted for the Invention(s) in the United States or in any foreign countries.

For valuable consideration, the receipt and sufficiency of which Assignors acknowledge, Assignors hereby sell, assign, and transfer to Assignee, its successors, legal representatives and assigns, the entire right, title and interest in and to: the Invention(s), the Application, and any Patents; any divisions, continuations, and continuations-in-part of the Application and any other application claiming priority rights from the Application; any reissues, reexaminations, or extensions of any and all Patents; the right to file foreign applications directly in the name of Assignee; and the right to claim priority rights deriving from the Application (collectively, the "Rights"). Assignors warrant that Assignors own the Rights, and that the Rights are unencumbered. Assignors also agree to not sign any writing or do any act conflicting with this assignment, and, without further compensation, sign all documents and do such additional acts as Assignee deem necessary or desirable to: perfect Assignee's enjoyment of the Rights; conduct proceedings regarding the Rights, including any
