Whereas, we, the above identified Inventors have invented certain new and useful aspects and improvements in the Invention identified above and described in the above-identified patent applications and/or patents (herein referred to as "Invention");

And, whereas we desire to assign our above-identified rights, title and interest in the Invention to the above-identified Assignee with our full authorization to serve as "Applicant" for any applications springing from the Invention;

Now, this indenture witnesseth, that for good and valuable consideration, the receipt whereof is hereby acknowledged;

We hereby assign, sell and transfer unto said Assignee all rights, title and interest in said Invention, said applications as identified above, including any divisions, continuations and continuations-in-part thereof, and in and to any and all:

- Letters Patent of the United States, and countries foreign thereto, which may be granted or have been granted for said Invention, and
- Reissues and reexaminations thereof, and
- Priority rights, Convention rights, and other benefits accruing or to accrue to us with respect to the filing of applications for patents or securing of patents in the United States and countries foreign thereto;

And we hereby authorize and request the Commissioner of Patents and Trademarks to issue any United States Letters Patent which may issue for said Invention to said Assignee, as assignee of the whole right, title and interest thereto;

And we further agree to sign and execute all necessary and lawful future documents, including applications for foreign patents, for filing divisions, continuations and continuations-in-part of said application for patent, and/or, for obtaining any reissue or reissues of any Letters Patent which may be granted for the aforesaid Invention, as the Assignee or its Designee(s) may from time to time require and prepare at its own expense.
