ASSIGNMENT

WHEREAS, I, Ulrich Haupts of Halle/Saale, Germany (hereinafter "Assignor"), have invented certain new and useful improvements in NOVEL IMMUNOGLOBULIN-BINDING PROTEINS AND THEIR USE IN AFFINITY PURIFICATION (hereinafter "Invention") for which application for a U.S. Patent was made on January 12, 2018 as Serial No. 15/744,147 (hereinafter "Application"), which claims priority to PCT International Patent Application Serial No. PCT/EP2016/066774, filed July 14, 2016, which itself claims priority to European Patent Application Serial No. 15177058.7 filed July 16, 2015 (hereinafter "Applications"). Assignor hereby authorizes Jenkins, Wilson, Taylor & Hunt, P.A. to insert the filing date and Serial No. above.

AND; WHEREAS, Navigo Proteins GmbH (formerly Scil Proteins GmbH), a corporation duly organized and existing under the laws of Germany, having its principal office and place of business at Heinrich-Damerow-Str. 1, Halle/Saale D-06120 Germany (hereinafter "Assignee"), is desirous of acquiring an interest therein.

NOW, THEREFORE, To Whom It May Concern, be it known that for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor has sold and by these presents does hereby sell, assign, transfer, and convey unto the Assignee, its successors, and assigns, his entire right, title, and interest in and to the Invention and Applications, and in and to any and all U.S. and foreign patent applications filed on the Invention, and in and to any and all continuations, continuations-in-part, or divisions thereof, and in and to any and all Patents of the United States of America and all foreign countries or reissues thereof which may be granted therefor or thereon (hereinafter, "Patents"), for the full end of the term for which said Patents may be granted, together with his right to claim the priority of the Applications in all countries in accordance with the Paris Convention, the Patent Cooperation Treaty, or other agreement or national law under which priority can be claimed, the same to be held and enjoyed by said Assignee, its successors, and assigns, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made. It is expressly agreed by Assignor and Assignee that this Assignment fully conveys and transfers from Assignor to Assignee the right to sue for any and all patent infringement occurring prior to the date of this Assignment.

Assignor hereby requests that said Patents be issued in accordance with this Assignment.

Assignor further covenants and agrees that, at the time of the execution and delivery of these presents, Assignor possesses the unencumbered right and authority to make this Assignment.

Assignor further covenants and agrees, and likewise bind his heirs, legal representatives, and assigns, to promptly communicate to said Assignee or its representatives any facts known to him relating to the invention, to testify and/or assist as requested by the Assignee in any interference or legal proceedings involving the Applications, Patents, or Invention, including cooperating in any enforcement proceedings involving the Applications, Patents, or Invention, to execute any additional papers which may be requested to confirm the right of the Assignee, its representatives, successors, and assigns to secure patent or similar protection for the invention in all countries and to vest in the Assignee complete title to the invention and Patents, without further compensation, but at the expense of said Assignee, its successors, assigns, and other legal representatives.
