ASSIGNMENT

Whereas, **Jovan Hutton Pulitzer**, an individual, residing at 9328 Wichita Trail, Frisco, Texas, 75034 and **Henry Joseph Legere, III**, an individual, residing at 5925 Standing Rock Drive, Austin, Texas, 78730 (“Assignors”), have invented certain new and useful improvements in a TWO-SIDED FLOW-THROUGH IMMUNOASSAY (the “Invention”), for which United States Provisional Application for Patent was filed on December 14, 2016, and assigned Serial No. 62/434,301 (the “Provisional Application”), from which a utility application (“Utility Application”) is intended to be filed claiming benefit of the Provisional Application under 35 U.S.C. 119(e); and

Whereas, **Reliant Immune Diagnostics, LLC**, a Texas corporation, located at 5925 Standing Rock Drive, Austin, Texas 78730 (“Assignee”), is desirous of acquiring the entire right, title, and interest in the Provisional Application.

Now, therefore, for other good and valuable consideration, Assignors, by these presents do hereby sell, assign, and transfer unto Assignee, its successors, assigns, and legal representatives the full and exclusive right to the Provisional Application and the Utility Application in the United States and the entire right, title, and interest in and to any and all Patents which may be granted therefor and/or therefrom in the United States, to any provisional rights arising from pre-issuance publication of said Utility Application, and to all divisions, reissues, substitutions, continuations, continuations-in-part, and extensions of said application. Assignors hereby authorize and request the Commissioner of Patents and Trademarks to issue all patents for the Invention, or patents resulting therefrom, insofar as Assignors’ interests are concerned, to Assignee, of the entire right, title, and interest in and to the same, for his sole use and benefit; and for the use and benefit of his legal representatives, to the full end of the term for which said Patent(s) may be granted, as fully and entirely as the same would have been held by the Assignors had this assignment not been made.

Assignors also sell and assign to Assignee, its successors, assigns and legal representatives the full and exclusive right, title, and interest to the Invention disclosed in said Provisional and/or Utility Application throughout the world, including the right to file applications and obtain patents, utility models, industrial models, and designs for the Invention in the Assignee’s own name throughout the world, including all rights of priority, all rights to publish cautionary notices reserving ownership of the Invention and all rights to register the Invention in appropriate registries, all foreign rights arising from pre-grant publication of the Provisional and/or Utility Application; and Assignors further agree to execute any and all powers of attorney, applications, assignments, declarations, affidavits, and any other papers in connection therewith necessary to perfect such right, title and interest in Assignee, its successors, assigns and legal representatives.

Assignors further agree to communicate to Assignee, its successors, assigns and/or legal representatives, any known facts respecting any improvements, and, at the expense of Assignee, to testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, continuation-in-part, reissue and substitute applications, make all lawful oaths, and generally do everything possible to vest title in Assignee and to aid Assignee, its successors, assigns and legal representatives to obtain and enforce proper protection for the Invention in all countries.

Name of First Joint Inventor: **Jovan Hutton Pulitzer**
Residence (City, State): **Frisco, Texas**
Signature: _____
