WHEREAS, Assignor owns all right, title, and interest in and to certain new and useful methods, devices, and/or systems that is disclosed, taught, and/or claimed in the patents and patent applications listed on Exhibit A hereto, as well as all patent applications and patents around the world that claim priority to or from, in whole or in part, any one or more of the patents listed on Exhibit A hereto (the "Patent");

WHEREAS, Assignee is desirous of acquiring the entire and exclusive right, title, and interest in and to, and possession and use of, the subject matter disclosed and claimed in the Patent, including any tangible materials, know-how and trade secrets related thereto (hereafter, collectively, the "Inventions"); and the entire and exclusive right, title, and interest in and to, and possession and use of, the Patent, including rights to claim priority thereto (hereafter, collectively, the "Intellectual Property").

NOW, THEREFORE, for and in consideration of good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor does hereby assign, transfer, and convey to Assignee, its successors and assigns, the entire and exclusive right, title, and interest in and to, and possession and use of, the aforesaid Intellectual Property, including without limitation, the right to file and prosecute applications for patent in the name of Assignee and/or Assignor; all income, royalties, damages and payments now or hereafter due or payable with respect to any patent or other right that is based on the Intellectual Property; and in and to all causes of action (either in law or in equity), and the right to sue, counterclaim, and recover for past, present and future infringement of the rights assigned hereunder, as fully and entirely as the same would have been held and enjoyed by Assignor if this transfer and assignment had not been made;

AND Assignor hereby authorizes and requests the appropriate governmental officials to issue any and all such Intellectual Property assigned hereunder or record the assigned rights on such, to Assignee, as the owner of the entire and exclusive right, title and interest in and to the same;

AND Assignor further covenants and agrees that Assignor will at any time upon request make, execute and deliver without further compensation, any and all other instruments in writing, including further applications, papers, affidavits, power of attorney, assignments, and other documents, and do all lawful acts and things, which, in the opinion of counsel for Assignee, its successors and assigns, may be required or necessary more effectively to secure to and vest in Assignee, its successors and assigns the Intellectual Property, and that Assignor will sign any

applications for reissue, division, continuation, continuation-in-part, counterpart, renewal, reexamination, substitute or extension of said Patent or any resulting patent or related property right;

AND Assignor further covenants and agrees that Assignor will at any time upon request communicate to the Assignee, its successors, assigns or other legal representatives any facts relating to the aforesaid Inventions, Patent, and Intellectual Property known to it, and will testify as to the same in any interference, litigation, mediation, arbitration or other proceeding when requested to do so.
