ASSIGNMENT

I,

Preston Charles Knibbe of Elsmere, Kentucky,

have invented a certain new and useful invention entitled "Accessory Mount for Goggles" for which a non-provisional utility patent application was filed on March 15, 2018, under Attorney Docket No. PK-001-NA and Patent Application Serial Number 15/922,823 in the United States Patent and Trademark Office;

Whereas, we hereby authorize and request the attorney empowered to act on our behalf in the aforementioned application to insert above the filing date and application serial number, when known;

And whereas, Symbiotic, LLC, a limited liability company of the State of Kentucky, with a place of business at 3709 Brookside Drive, Apartment F, Elsmere, Kentucky, 41018, hereinafter called the Assignee, is desirous of acquiring the entire right, title, and interest in and to said application and the inventions disclosed therein and any patents which may be granted therefrom;

Now, therefore, for good and valuable consideration, the receipt of which is hereby acknowledged, we hereby sell, assign, and transfer unto said Assignee, its successors and assigns, the entire right, title, and interest in and to said application and any divisions or continuations thereof, and the inventions disclosed therein, and any improvements thereon, and any patents which may be granted or reissued thereon, and we hereby authorize and request the Commissioner of Patents and Trademarks to issue any patents thereon, and reissues thereof, to said Assignee, its successors and assigns; and we hereby authorize said Assignee, its successors and assigns, to file in its own name applications for patents in foreign countries in connection with the inventions hereby transferred, under the International Convention claiming priority of said United States application or otherwise, and to secure in its own name the patents issued thereon; and I hereby agree that, upon request, I will sign all papers, and make all rightful oaths, and to do all acts which said Assignee, its successors and assigns, may consider necessary in connection with said United States application, and in connection with any other United States or foreign applications that may be filed in connection with said inventions, and with any improvements thereon, and in connection with any patents issued or reissued thereon.
