IN THE MATTER OF US Patent Application No.
15/735,119 _____

I, Dr. Ernst-Ulrich Wittmann _____,

translator to Fleuchaus & Gallo Partnerschaft mbB of Steinerstr. 15A, D-81369 München, do
solemnly and sincerely declare that I am conversant with the English and German languages and
am a competent translator thereof, and that to the best of my knowledge and belief the following is
a true and correct translation of the claim to a service invention dated June 18, 2015.

Date: March 16, 2018

A handwritten signature in dark ink, appearing to read 'E. Wittmann', is written over a horizontal dashed line.

Dr. Ernst-Ulrich Wittmann

1. We, the signatory company MOOG GmbH,

confirm the receipt of the notification of a service invention on 4 February 2015 having the following title and number

"Electrical contacting of a multiple pressure-sensor module using spring contacts", number MD-585 or 2015_6702, F & G Ref. P13893EP00

of (co-)inventor Thomas Röhlig, Lindberghstr. 10, 70736 Fellbach, Germany

☒ We claim unrestricted use of the service invention and/or confirm the transfer of rights made in accordance with § 6 ArbStättG [German Employee Inventions Act]. We propose an agreement pursuant to No. 2.

☐ Based on the prior art that we have become aware of, we consider the reported service invention to be non-protectable. We propose an agreement pursuant to No. 3.

☐ We release the invention. Nos. 2 and 3 below are irrelevant.

Date

Signature of the management: Harald Seiffer

I confirm the receipt of this statement.

Date: 18 June 2015 Signature of the (co-)inventor: Thomas Röhlig

2. If you exempt MOOG GmbH from the formal obligations of the German Employee Inventions Act (obligation to implement a German patent application (§ 13 (1)) to release the invention for foreign states (§ 13 (2)), to submit domestically and abroad (§ 16)) a transfer request upon patent application, we will pay each of the inventors involved in the present invention a claim premium of € 250.00, the total amount for an invention involving a number of inventors being limited to € 750.00.

In the case of a patent application and/or the use of the invention, the obligation for remuneration of the Employee Inventions Act remains unaffected. If an application for rights of protection is relinquished without transfer of compensation, the aforementioned payment shall settle all payment claims.

DOC ID: 504679397

3. MOOG GmbH and the (co-)inventor agree that the subject-matter of the service invention based on the prior art (Annex) is not patentable under patent law. In this connection, MOOG GmbH is under no obligation to make use of the reported service invention or to release it.

In return for the payment of a premium of €, wherein the total amount for a service invention application for several service invention applicants is limited to €, the (co-)inventor waives the requirement for the responsible arbitration board of the German Patent and Trademark Office to be called upon to assess the protectability, and waives the right to make the subject-matter described in the said service invention the subject-matter of patent applications. MOOG GmbH is free to use the subject-matter described in the said service invention excepting applications for protective rights. In particular, under patent law, MOOG GmbH is permitted to publish the subject-matter of the service invention.

I agree with the above-mentioned regulation pursuant to No. 2 and I accept this offer. Please pay the relevant premium with the next salary payment.

Date: 18 June 2015 Signature of the (co-)inventor: Thomas Röhlig
