Inventor's Assignment

This inventor's assignment (this "Assignment") is by Rishabh Jain, an individual residing at 1425 North McCarthy Road, Apt. 7, Appleton, WI 54913, ("Inventor") for the benefit of Bemis Company, Inc., a company located at One Neenah Center, 4th Floor, Neenah, WI 54956 ("Bemis") and the Wisconsin Alumni Research Foundation, a non-stock, non-profit Wisconsin corporation located at 614 Walnut Street, Madison, Wisconsin 53726-7365 ("WARF"). WARF and Bemis are collectively referred to as the "Assignees".

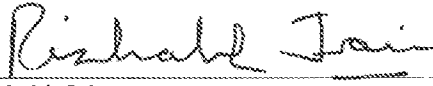

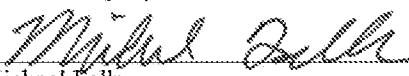

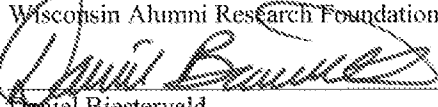

Inventor is an inventor of the inventions entitled "METHODS AND COMPOSITIONS FOR ON-DEMAND RELEASE OF ClO_2 GAS FROM UV-ACTIVATED CHLORITE ION" as described in invention disclosure assigned WARF Reference Number P150239 (the "Inventions") which forms the subject matter of the provisional or utility United States patent application and/or the patent application filed under the Patent Cooperation Treaty, as identified below. These patent application(s) are identified as follows:

METHODS AND COMPOSITIONS FOR ON-DEMAND RELEASE OF ClO_2 GAS FROM UV-ACTIVATED CHLORITE ION				
Filing Type	WARF Ref.	Filing Country	Serial Number	Filing Date
PRV	P150239US01	UNITED STATES	62/206464	8/18/2015

Inventor desires to assign the Inventions to the Assignees. WARF and Bemis desire to jointly own the Inventions. For good and valuable consideration, the receipt of which is hereby acknowledged, the parties agree as follows:

1. Inventor hereby assigns to Assignees his or her entire right, title, and interest in and to the Inventions and in and to all patent applications claiming the Inventions and to any patents issuing therefrom including all divisionals, reissues, re-examinations, continuations, continuations-in-part, foreign applications and foreign patents, and any other patents or patent applications claiming priority to any of the foregoing throughout the world (the "Patents"). Inventor further assigns to Assignees all causes of action, rights and remedies arising under the Inventions or Patents prior to or after the effective date of this Assignment. Inventor authorizes and requests that all patents that issue from the Inventions or Patents issue to Assignees or their respective successors and assigns.
2. Each Assignee will jointly own the Inventions and the Patents with the other Assignee. If either Assignee has any ownership right in the Inventions or Patents as of the effective date of this Assignment, then such Assignee hereby assigns to the Assignees any respective right, title and interest in and to the Inventions and Patents in the United States of America and any foreign country so that joint ownership, as contemplated by this Assignment, may be accomplished.
3. Upon reasonable request by either Assignee, Inventor will (i) execute any further documents, papers, or forms, and assist Assignees in any other actions, as reasonably necessary to secure, prosecute, assign, perfect, record, or enforce the Patents; and (ii) testify in any legal proceeding and sign all lawful papers when called upon to do so and timely deliver the same as requested by Assignees (or their respective successors, assigns, or representatives), at no additional charge to Assignees but at no expense to Inventor.

The parties have executed this Assignment as of the dates indicated below:

	9/30/2016.
