## Assignment of Patent Application

Hagen Ruff, a resident of the City of Coral Gables, State of Florida ("Assignor") is co-owner of the invention described in the U.S. Design Patent Application, filed by Chava Wind Power, Inc. ("Assignee") in the U.S. Patent and Trademark Office, titled: **Wind Turbine with Stabilizer Strut Features**, U.S. Patent Application Serial Number: 29/516,023 filed 01/28/2015, (the "Patent Application").

Chava Wind Power, Inc, a Florida Corporation, ("Assignee") desires to acquire all Assignor's rights in and to the Patent Application and any patent (and any reissues or extensions) that may be granted.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignor assigns to Assignee 100% of his right, title, and interest in the invention and Patent Application (as well as such rights, foreign and domestic, in any divisions, continuations, in whole or part or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part or substitute applications) filed claiming the benefit of the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.

Date: 4/25/18
