This Patent Rights Assignment (this “Assignment”) is made effective this 8th day of March, 2018, by and between Allego Holdings, Inc., a corporation organized and existing under the laws of Massachusetts, and having a usual place of business at 117 Kendrick Street Suite 800 Needham, MA 02494 (“Assignor”) and Allego, Inc., a corporation organized and existing under the laws of Massachusetts, and having a usual place of business at 117 Kendrick Street Suite 800 Needham, MA 02494 (“Assignee”).

WHEREAS, Assignor possesses certain rights in and to the patents and patent applications (and patents issuing on such applications) set forth on Exhibit A attached hereto and incorporated herein by reference (collectively, the “Patent Rights”) and the invention(s) described and/or claimed in the Patent Rights (the “Inventions”); and

WHEREAS, Assignor and Assignee are parties to that certain Assignment and Contribution Agreement, dated as of the date hereof (the “Assignment Agreement”), pursuant to which Assignor transferred, sold and conveyed to Assignee substantially all of the assets of Assignor, including the Inventions and Patent Rights; and

WHEREAS, Assignor now wishes to assign the Inventions and Patent Rights to Assignee, and Assignee desires to acquire the Patent Rights from Assignor.

NOW, THEREFORE, in consideration of 19,706,458 shares of Assignee’s Common Stock, par value \$0.00001 per share, the premises set forth above and in the Assignment Agreement and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged:

Assignor does hereby sell, assign, convey and transfer unto Assignee and its successors, assigns, and legal representatives, Assignor’s entire right, title and interest in and throughout the world in and to the Inventions, together with Assignor’s entire right, title and interest in and to the Patent Rights and such other patents as may issue thereon or claim priority under United States law or international convention, including but not limited to non-provisionals, continuations, divisionals, reissues, reexaminations, reviews, extensions, and substitutions of patents and patent applications within the Patent Rights or such other patents, and any right, title and interest Assignor may have in applications to which the Patent Rights claim priority; the Inventions and the Patent Rights to be held and enjoyed by Assignee for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which said patents may be granted as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made; and Assignor hereby conveys all of its rights arising under or pursuant to any and all United States laws and international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for patent, including but not limited to any cause(s) of action and damages accruing prior to this assignment. Assignor hereby acknowledges that this assignment, being of Assignor’s entire right, title and interest in and to the Inventions and the Patent Rights carries with it the right in Assignee to apply for and obtain from competent authorities in all countries of the world any and all patents by attorneys and agents of Assignee’s selection and the right to procure the grant of all patents to Assignee in its own name as assignee of Assignor’s entire right, title and interest therein.

Assignor hereby further agrees for itself and its successors, assigns, agents, and legal representatives to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary to secure fully the Patent Rights to Assignee, its successors,

assigns, and legal representatives, as well as to third parties at the request of Assignee including the execution of documents (including, without limitation, petitions, specifications, oaths, assignments, disclaimers, declarations and affidavits) relating to non-provisional, substitution, continuation, divisional, reissue, reexamination, or corresponding foreign or international patent applications within the Patent Rights, as requested by Assignee, and generally do everything possible to aid Assignee, its successors, assigns and legal representatives to obtain, record, maintain, and enforce full protection for the Inventions in all countries, but in each instance at Assignee's reasonable expense.

Assignor hereby further agrees to provide documentary evidence and statements or testimony in any interference, opposition, re-examination, reissue or other proceeding in which any of the Patent Rights may be involved.

Assignor hereby warrants that it has not knowingly conveyed to others any rights in the Patent Rights or the Inventions or any license to use the same or to make, use or sell anything embodying or utilizing any of the Inventions, and that it has good right to assign the Inventions and the Patent Rights without encumbrance.

Assignor does hereby authorize the Director of the United States Patent & Trademark Office, and the empowered officials of all other governments whose duty it is to record patents, applications and title thereto, to record the Patent Rights and title thereto as the property of Assignee, its successors, assigns, or legal representatives in accordance with the terms of this instrument.

Assignor does hereby further authorize and request the Director of the United States Patent and Trademark Office and the empowered officials of all other governments to issue such Patent Rights or patents as shall be granted upon the Patent Rights, or applications based thereon, to Assignee, its successors, assigns, or legal representatives.
