SHORT FORM PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT (this “Agreement”) dated as of January 26, 2018 (the “Effective Date”) is between:

- (i) Sony Corporation, a Japanese corporation (“Assignor”); and
- (ii) Wi-Fi One, LLC, a Delaware limited liability company (“Assignee”).

WITNESSETH:

WHEREAS, Assignor, Assignee, and Wi-Fi One Technologies International Limited, entered into a certain Patent Assignment and Grant-Back License Agreement, dated as of January 26, 2018 (the “Patent Assignment Agreement”);

WHEREAS, under the Patent Assignment Agreement, Assignor agreed to assign its rights in the Assigned Patents (as defined below) to Assignee; and

WHEREAS, Assignor now wishes to assign all right, title, and interest in and to the Assigned Patents to Assignee as provided for in the Patent Assignment Agreement as further set forth below.

NOW, THEREFORE, in consideration of the foregoing and the mutual promises and agreements contained in this Agreement, and for other good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, the parties hereby agree as follows:

1. Assignment. Pursuant and subject to the terms and conditions of the Patent Assignment Agreement, Assignor hereby transfers, assigns, and conveys to Assignee all right, title, and interest throughout the world (under any and all laws and in any and all jurisdictions) in and to all of the patents, patent applications, and provisional patent applications set forth on Schedule A attached hereto (collectively, the “Assigned Patents”), in each case, subject to all Existing Encumbrances (as defined in the Patent Assignment Agreement) and all FRAND/RAND commitments applicable to the Assigned Patents. Pursuant to the foregoing assignment, each of the Assigned Patents will hereafter be for Assignee’s own use and enjoyment, and for the use and enjoyment of Assignee’s successors and assigns, as fully and entirely as the same would have been held and enjoyed by the applicable Assignor if this Agreement had not been made. The foregoing assignment includes, without limitation, the rights to (a) register or apply in all countries and regions for patents, utility models, design registrations and like rights of exclusion and for inventors’ certificates for the Assigned Patents; (b) prosecute, maintain, and defend the Assigned Patents before any public or private agency, office or registrar including by filing reissues, reexaminations, divisions, continuations, continuations-in-part, substitutes, extensions and all other applications and post issue proceedings included in the Assigned Patents; (c) claim priority based on the filing dates of any of the Assigned Patents under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Convention, the Paris Convention, and all other treaties of like purposes; and (d) sue and recover damages or other compensation for past, present, or future infringements of the Assigned Patents, the right to sue and obtain equitable relief, including injunctive relief, in respect of such infringements, and

the right to fully and entirely stand in the place of the Assignor in all matters related to the Assigned Patents.

2. Authorization. Assignor also hereby expressly authorizes the patent office or governmental agency in each and every jurisdiction worldwide (including the Commissioner of Patents and Trademarks in the United States Patent and Trademark Office, and the corresponding entities or agencies in any applicable foreign countries or multinational authorities) (the "**Applicable IP Offices**") to: (a) issue any and all patents or certificates of invention or equivalent which may be granted upon any of the Assigned Patents in the name of Assignee, as the assignee to the Assignor's interest therein; and (b) record Assignee as the assignee of the Assigned Patents and to deliver to Assignee, and to Assignee's attorneys, agents, successors or assigns, all official documents and communications as may be warranted by this Agreement.

3. Further Assurances. Each party hereby agrees to execute and deliver to the other party all necessary documents and take all necessary actions reasonably requested by such party from time to time to confirm or effect the assignments set forth in this Agreement, or otherwise to carry out the purposes of this Agreement, including, without limitation, by providing executed originals of short-form assignment agreements entered into by Assignor and Assignee on the Effective Date for filing or otherwise evidencing the assignments set forth in this Agreement with the Applicable IP Offices; provided, however, that nothing herein will obligate Assignor to incur any cost or pay any expense in connection therewith.

4. Governing Law. This Agreement will be governed by and construed and interpreted in accordance with the Laws of the State of Delaware irrespective of the choice of law principles of the State of Delaware, as to all matters, including matters of validity, construction, effect, enforceability, performance and remedies and in respect of the statute of limitations or any other limitations period applicable to any claim, controversy or dispute.

5. General Provisions. This Agreement may be executed in any number of counterparts, each of which will be deemed to be an original, and all of which together will constitute one and the same instrument. Delivery of an executed counterpart of a signature page to this Agreement by facsimile or electronic mail will be as effective as delivery of a manually executed counterpart of this Agreement. This Agreement may not be supplemented, altered, or modified in any manner except by a writing signed by all parties hereto. The failure of any party to enforce any term or provision of this Agreement will not waive any of its rights under such term or provision. In the event of a conflict between the terms of this Agreement and the terms of the Patent Assignment Agreement, the terms and conditions of the Patent Assignment Agreement will govern.
