### ASSIGNMENT

WHEREAS, I, Daniel RACAMIER of La Balme de Sillingy, France have invented certain improvements in a FLASK, for which I filed International Design Registration No. DM/093391 on November 10, 2016, which was assigned U.S. Design Patent Application Serial No. 35/501,954 in the United States; and

WHEREAS, MAPED, a French company, having its principal place of business in Argonay, France, is desirous of acquiring an interest therein;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which hereby are acknowledged, I, Daniel RACAMIER have sold, assigned, and transferred, and do hereby sell, assign, and transfer, to MAPED, its successors and assigns, the full and exclusive right to the invention in the United States and its territorial possessions and in all foreign countries, and the entire right, title, and interest in and to any and all Letters Patent that may be granted therefor in the United States and its territorial possessions and in any and all foreign countries, and in and to any and all divisions, continuations, reissues, substitutions, and extensions thereof.

I hereby authorize and request the Patent Office officials in the United States and any and all foreign countries to issue any and all of said Letters Patent, when granted, to MAPED, as the assignee of my entire right, title, and interest in and to the same, for the sole use of MAPED, and its successors and assigns.

Further, I hereby covenant and agree to and with MAPED, and its successors and assigns, at the time of execution and delivery of these presents, that I am the sole and lawful owner of the entire right, title, and interest in and to the invention and the above-identified patent application, and that the same are unencumbered, and that I have good and full right and lawful authority to sell and convey the same in the manner herein set forth.

Further, I agree that I will communicate to MAPED, or its representatives, any facts known to me respecting the invention, and testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, reissue, substitution, and extension applications, execute all necessary assignment papers to cause any and all of said Letters Patent to be issued to MAPED, make all rightful oaths, and generally do everything possible to aid MAPED, and its successors and assigns, to obtain and enforce proper protection for the invention in the United States and in any and all foreign countries.
