PATENT ASSIGNMENT

WHEREAS, Donaldson Company, Inc., a Delaware corporation having a place of business at 1400 West 94th Street, Bloomington, Minnesota 55431 ("Assignor"), is the owner of the United States and foreign patents and patent applications identified on the attached Schedule 1; and

WHEREAS, Clean Diesel Group LLC a Delaware limited liability company having a place of business at 10505 Plaza Drive, Whitmore Lake, MI 48189 ("Assignee"), desires to acquire the entire right, title and interest in and to the United States and foreign patents and patent applications identified on the attached Schedule 1 and including the inventions claimed therein (the "Patents").

NOW, THEREFORE, in exchange for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor hereby assigns to Assignee, and its successors and assigns the following:

- (1) The entire right, title and interest to the Patents, and to each U.S. and foreign patent application and patent from which the Patents claim, in whole or in part, and to each U.S. and foreign patent application and patent that claims priority to the Patents, in whole or in part; and
- (2) The entire right, title and interest to any U.S. or foreign patents that may issue with respect to the inventions claimed in the Patents; and
- (3) The entire right, title and interest to any and all Letters Patent, reexaminations, renewals, reissues, extensions, substitutions, continuations, continuations-in-part, or divisions of the Patents, and all foreign applications based thereon; and
- (4) The right to apply for patents, Utility Models, or Inventor's Certificates in foreign countries in its own name and to claim any priority rights to which such foreign applications are entitled under international conventions, treaties or otherwise, as would have been by Assignor; and
- (5) The right to enforce patent rights to such Patents as fully and entirely as the same would have been held and enjoyed by the Assignors if this assignment had not been made; together with all claims by Assignors for damages by reason of past infringement or for provisional rights and including the right to sue for, and collect the same for its own use and benefit, and for the use and benefit of its successors, assigns, and other legal representatives.

The parties hereto acknowledge and agree that this Patent Assignment is entered into pursuant to the Asset Purchase Agreement between the Parties dated March 28, 2018 (the "Purchase Agreement"), to which reference is made for a further statement of the rights and obligations of Assignor and Assignee with respect to the Assigned Patents. The representations, warranties, covenants, agreements, and indemnities contained in the Purchase Agreement shall not be superseded hereby but shall remain in full force and effect to the full extent provided therein. In the event of any conflict or inconsistency between the terms of the Purchase Agreement and the terms hereof, the terms of the Purchase Agreement shall govern.

Assignor hereby authorizes and requests the Commissioner of Patents to issue to Assignee any patents that may be granted in accordance with this Patent Assignment.

This Patent Assignment shall be binding upon and shall inure to the benefit of the parties hereto and their respective successors and assigns.
