ASSIGNMENT

I,
Robert Bernstine of Earleville, Maryland, U.S.A.

while employed by Intuition Design, Inc. ("Assignor"), together with

Michael Thompson of Tucson, Arizona, U.S.A.
Samuel Psota of Oro Valley, Arizona, U.S.A.
Richard Powers of Tucson, Arizona, U.S.A.
Jeffrey Klebenow of Casa Grande, Arizona, U.S.A.
Chirayu Patel of Oro Valley, Arizona, U.S.A.
Jenna Lefkowitz of Tucson, Arizona, U.S.A.

while employed by Ventana Medical Systems, Inc. (hereinafter, "Co-Inventors")

have invented one or more inventions (collectively, the "Invention") as described in U.S. Design Patent Application No. 29/629532, entitled Diagnostic Instrument filed on December 13, 2017 which application is referred to herein as the "Patent Application."

The Invention was made as a result of Assignors activities at or on behalf of Intuition Design, Inc. or as a result of utilization of information, facilities or other resources of Intuition Design, Inc. The conditions under which the Invention was made are such as to entitle Intuition Design, Inc. to each of Assignors' entire respective right, title, and interest in the Invention and any corresponding patent applications and/or patents in the United States and its territories and dependencies, and all other countries and jurisdictions of the world.

In consideration of Assignors obligations and other valuable consideration, Assignors each have sold, assigned and transferred or hereby sell, assign, and transfer to Intuition Design, Inc., its successors and assigns (collectively, "Assignee"), each of our respective full and exclusive right, title, and interest in the Invention, the Patent Application, and any corresponding patent rights throughout the United States and its territories and dependencies, and all other countries and jurisdictions of the world. The conveyance of patent rights includes, without limitation, full and exclusive right, title, and interest in all patent applications claiming all or part of the Invention and/or claiming the benefit of a filing date of the Patent Application, and any patents that may issue from such patent applications in the United States and/or all other countries and jurisdictions throughout the world, and any divisional, continuation, continuation-in-part, substitution, conversion, re-examination, reissue, renewal, prolongation or extension thereof; and the right to claim priority from the Patent Application as provided for by United States law, the Patent Cooperation Treaty, the European Patent Convention, the Paris Convention, or other applicable law.

Assignor authorizes and requests the issuance of any patents arising from non-design patent applications claiming all or part of the Invention and/or claiming the benefit of a filing

date of any design application to the Assignee to be held as fully and entirely as the same would have been held by us had this assignment not been made.

Assignor warrants that there are no outstanding assignments, grants, liens, encumbrances, or agreements either written, oral, or implied that will impair, diminish, limit, or abridge the interest herein conveyed.

Assignor also agrees upon reasonable request to communicate with the Assignee, its representatives or agents, any facts known to us respecting all or part of the Invention, and testify in any legal proceedings, sign all lawful papers, execute all non-design, divisional, continuation, continuation-in-part, re-examination, and reissue applications, make all rightful oaths, provide all requested documents, and do everything reasonably possible to aid the Assignee, its representatives or agents, to obtain and enforce proper patent protection for all or part of the Invention in the United States or any other country of the world. These provisions are binding upon each of our heirs, legal representatives, administrators and assigns.

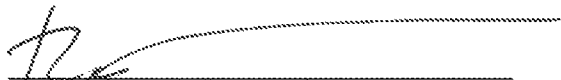

The assignment of the rights of the Co-Inventor(s) are subject to separate assignment agreements. Assignor explicitly approves any such assignments.

This Assignment may be executed in one or more counterparts, each of which when executed and delivered, by facsimile or other electronic transmission, by mail delivery, or by other form of delivery, will be an original and all of which will constitute but one and the same Assignment.

IN WITNESS WHEREOF, this Assignment is executed as of the date indicated below.

Dated: 4/12/18

ASSIGNOR:

Robert Bernstine
