Assignment of Interest

Divya Anantharaman ("Inventor") is an inventor of REMOTE AUDIO MONITOR SYSTEM COMMUNICATION, as described in the U.S. Patent Application having Serial Number 15/626,090, filed June 17, 2017 (the "Patent Application"). Ikabit, Inc. ("Assignee"), a corporation existing under the laws of Delaware, is entitled to acquire all rights, title, and interest in and to the Patent Application and the patent (and any reissues or extensions) that may be granted.

Therefore, in consideration of salary paid to Inventor as an employee, fees paid to Inventor as a consultant, grant of equity or securities, or other consideration, the receipt and adequacy of which is hereby acknowledged, and pursuant to any employment agreement, consulting agreement, or assignment agreement between Inventor and Assignee or Assignee's subsidiaries, assigns, agents, or affiliates, Inventor hereby assigns to Assignee all rights, title, and interest in the invention and Patent Application, including all substantial rights, and all rights to sue for infringement, including past infringement (as well as all such rights in any divisions, continuations in whole or part or substitute applications, as well as any related patent applications filed in other countries and jurisdictions) to Assignee for the entire term of the issued Patent and any reissues or extensions or amendments that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part or substitute applications) filed claiming the benefit of the Patent Application.

Inventor authorizes the United States Patent and Trademark Office to issue any patents resulting from the Patent Application to Assignee. The right, title and interest in any patent is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Inventor had this assignment not been made.

Inventor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.
