This Assignment assigns (a) the Application and all other applications that may be made for, and all patents, utility models, design registrations, and other rights of exclusion and inventors' certificates for, any of the Subject Matter (collectively the "Applications and Granted Rights") in every country or region, (b) the right to claim priority based on and the benefit of the filing date of any of the Applications and Granted Rights under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Convention, and all other applicable treaties or conventions, and (c) the right to pursue, collect, and retain in the Assignee's name or otherwise, damages and any other remedies arising from any past, present, or future infringement of the Subject Matter, the Applications and Granted Rights, and any other rights assigned by this Assignment.

I authorize the Assignee to apply for and pursue protection for any or all of the Subject Matter, the Applications and Granted Rights, and any other rights assigned by this Assignment in all countries, regions, and territories of the world, in my name or in the Assignee's name.

I represent and warrant that I have the right and power to make this Assignment and that I have not made and will not make any other assignment that conflicts with this Assignment.

I will communicate to the Assignee (or at the request of the Assignee to other parties) all known facts in any form relating to the Subject Matter, will execute and provide all oaths and declarations, statements, testimony, assignments, powers of attorney, applications, and documents, and will perform all other lawful acts necessary or desirable to secure fully to the Assignee the rights, titles, and interests assigned by this Assignment.

ASSIGNMENT

This Assignment, dated as of the last signature below, ("Effective Date"), is made and entered into by and between, **DEAN JOHANNING**, an individual (hereinafter "Johanning"), and **BIXBY ENERGY SYSTEMS, INC.**, a Delaware corporation (hereinafter "BES") pursuant to an Assignment Agreement by and between the same parties.

WHEREAS, Johanning owns and has the right to assign all rights, title and interest in and to the Assigned Technology and Assigned Rights (set forth in attached Schedule 1); and

WHEREAS, Johanning desires to assign all rights, title and interests in and to the Assigned Technology and the Assigned Rights, and BES desires to obtain same,

NOW, THEREFORE, in consideration of the mutual covenants contained herein and in the Assignment Agreement between the parties, and other good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties agree as follows:

Johanning does hereby, assign and transfer to BES, its successors, assigns and other legal representatives, all outstanding right, title and interest, worldwide, in and to the Assigned Technology and the Assigned Rights, together with any and all inventions included in the foregoing, and all reissues, reexaminations, statutory invention registrations, modifications and extensions of any patent rights therein or thereto, and further including all rights to claim priority, all of the foregoing to be held and enjoyed by BES for its own use and for the use of its successors, assigns or other legal representatives, together with all of the income, royalties, damages and payments now or hereafter due or payable with respect thereto, and all claims for damages by reason of past, present and future infringement of the technology and rights assigned hereunder with the right to sue for and collect the same for its own use and benefit, and for the use and benefit of its successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Johanning if this transfer to BES had not been made.
