WHEREAS, Assignors are the inventors and creators and, collectively, the sole owners of the "Method and Devices for Minimally-Invasive Extraocular Delivery of Radiation to Posterior Portion of the Eye" (the "Invention") and other new and useful improvements as described in the Provisional Patent Application(s) in the United States Patent and Trademark Office Docket #SALU 08.01, Application #61010322, Docket #SALU 08.02, Application #61033238, and Docket #SALU 08.03, Application #61035371, (the "Patent"). For the purposes of this Assignment, the term Patent shall include a patent, Letters of Patent, or Certificates of Invention or Utility Model or Design registration or other form of protection for the Invention issued by a government or governmental agency and any reexamination certificates, reissues, divisionals, continuations, continuations-in-part, foreign counterparts, additions and or substitutions thereof claiming the Invention. The term Invention shall include any and all improvements, modifications, incorporations, derivatives and variations of it.

WHEREAS, the Assignors are desirous of assigning all of their respective right, title, and interest throughout the world related to the Invention and/or the Patent or similar legal protection to be obtained thereof, Assignee on the terms and for the consideration set forth herein.

WHEREAS, Assignee is desirous of accepting the Assignors' interest in the Invention and Patent.

NOW, THEREFORE, for good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the parties hereto agree as follows:

1. Assignment. Each Assignor hereby irrevocably transfers and assigns to Assignee, its successors and assigns, in perpetuity, all of Assignor's right, title and interest, throughout the world in and to the Invention and the Patent and any registrations and Patent Applications, as defined herein; relating thereto, or Patents issued or issuing on such and in and to all works based upon, derived from, or incorporating the Invention, and in and to all income, royalties, damages, claims and payments now or hereafter due or payable with respect thereto, and in and to all causes of action, either in law or in equity for past, present, or future infringement based on the Invention and/or the Patent, and in and to all rights corresponding to the foregoing

throughout the world. Patent Applications shall include the right to file patent applications on the Invention or have any patents issued in the name of the Assignors.

This Assignment shall allow the Assignee to file and maintain Patent and Patent Applications in its own name, but naming the Assignors as the inventors, in all countries of the world (where it is permissible) and the right to claim the benefit of the priority right provided by the International Convention of 1883, as amended.

In addition, each Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States of America to issue to Assignee all U.S. Patents that may be granted.
