## ASSIGNMENT OF PATENT APPLICATION

WHEREAS, I, Clarke McAllister, of Eugene, Oregon, have invented devices, systems and methods entitled "AERIAL INVENTORY ANTENNA", hereinafter referred to as the "invention," for which on 30 Aug 2017 I filed United States Patent Application No. 15/691,739.

WHEREAS, ADASA INC., an Oregon Corporation, herein referred to as "Assignee" whose mailing address is 4060 Sunridge Drive Eugene, Oregon USA 97405 is desirous of acquiring the entire right, title, and interest in the same.

NOW, THEREFORE, in accordance with the terms of my employment agreement, which was in place at least as early as the date the application for which this invention was filed, and for other good and valuable consideration, the receipt of which is hereby acknowledged, I, by these presents do hereby sell, assign, and transfer unto the Assignee (1) the full and exclusive right to the invention for the United States and all foreign countries, (2) the entire right, title, and interest in and to any and all Patents which may be granted therefore, in the United States or any foreign country, and (3) any provisional patent applications, divisions, continuations, continuations in part, improvements, reissues, or extensions that may be made or granted thereon, in the United States or any foreign country.

FURTHER, I agree to execute further instruments proper for effectuating the premises.

FURTHER, I hereby authorize and request the Commissioner of Patent and Trademarks to issue the patent(s) to the Assignee of the entire right, title, and interest in and to the same, for Assignee's sole use and behoof; and for the use and behoof of Assignee's legal representatives, to the full end of the term for which the patent(s) may be granted, as fully and entirely as the same would have been held by me had this assignment and sale not been made.

IT SHOULD BE NOTED that this assignment acknowledges and affirms the assignment document(s) of any related applications including, but not limited to, applications from which this application claims priority directly or indirectly, provisional application(s), nonprovisional(s), divisional application(s), continuation application(s), continuation in part application(s), foreign (or PCT) application(s), improvements, reissue, and/or extension.
